# Seven Day Precipitation Forecast

- An approaching storm system will bring scattered showers to the area early Friday through Sunday.
- Rainfall totals through Sunday are expected to be 0.25 to 0.50 inches, with some isolated higher amounts possible
- Much cooler weather for Sunday and Monday, some locations may hit the freezing mark Monday morning
- A warming trend through at least the middle of next week
- Dry conditions expected Sunday through Tuesday evening
- Slight chance of showers on Wednesday, with very limited precipitation

# Drought Outlook

The latest monthly and seasonal outlooks can be found on the [CPC homepage](#)

- Very limited drought improvement is expected through the next 7 days, with the showery activity for the first half of the weekend. Area rivers and creeks are showing some response to the precipitation of last week, however with limited upcoming precipitation, water levels will likely start to slowly fall.
- Beyond 7 days precipitation amounts are expected to remain from near normal to slightly above normal, providing limited drought relief.
