RECORD GROWING SEASON FOR FLAGSTAFF...

THE FINAL FREEZE RECORDED AT FLAGSTAFF AIRPORT DURING THE SPRING OF 2009 WAS ON APRIL 30TH. THE NEXT FREEZING TEMPERATURE WAS NOT REACHED UNTIL THE MORNIN OF OCTOBER 1ST...A SPAN OF 153 DAYS. THIS LENGTH OF TIME SURPASSED THE PREVIOUS RECORD OF 146 DAYS SET BACK IN 1940.

THE DRY MONSOON...

AN UNUSUAL LARGE SCALE PATTERN DISRUPTED THE NORMAL FLOW REGIME THAT WOULD ALLOW MONSOON MOISTURE TO BE PUSHED ACROSS ARIZONA FROM JULY THROUGH SEPTEMBER.

ARIZONA WOULD EITHER EXPERIENCE DRY SOUTHWEST FLOW...OR BE LOCATED UNDERNEATH A CAPPING SUBTROPICAL RIDGE MOST OF THE TIME. THIS RESULTED IN MUCH BELOW AVERAGE PRECIPITATION FOR THE TYPICAL JUNE 15TH THROUGH SEPTEMBER 30TH MONSOON SEASON ACROSS NORTHERN ARIZONA.

THE FIRST REPORTS OF RISING WATER AND FLOODING WERE RECEIVED AT 220 PM MST...WITH ADDITIONAL REPORTS ARRIVING THROUGH THE AFTERNOON. A RECORD RAINFALL TOTAL FOR THE DATE WAS MEASURED IN SEDONA TOTALING 2.5". FLASH FLOODING AT THE TLAQUEPAQUE ARTS AND CRAFTS VILLAGE AND LOS ABRIGADOS CAUSED EXTENSIVE DAMAGE. VEHICLES THAT WERE PARKED THERE WERE WASHED INTO THE VILLAGE...WITH SOME CARS STACKED ATOP ONE ANOTHER AS A RESULT OF THE FORCE OF THE FAST MOVING FLOOD WATERS.

THE STORM BROUGHT WITH IT STRONG WINDS AND SNOWFALL TOTALS RANGING FROM 18 INCHES TO OVER 2 FEET OVER THE MOUNTAINS. WINDS ALONG AND AHEAD OF THE COLD FRONT CAUSED WIDESPREAD BLOWING AND DRIFTING OF SNOW AS WELL AS SOME PROPERTY AND TREE DAMAGE...AND POWER OUTAGES.
