

FLAGSTAFF, AZ

NATIONAL WEATHER SERVICE

April 2024 Climate Summary

A couple of storm systems impacted the region in April, the first arriving on the 5th and 6th and the second storm from the 25th to the 27th. Both brought a few inches of snow to the high country and rainfall to lower elevations, as well as gusty winds. Overall monthly temperatures were near normal with precipitation near to above normal along and south of the Mogollon Rim, and drier to the north.
