MONTH IN REVIEW FOR NORTHERN ARIZONA FOR DECEMBER 2016

... DECEMBER TEMPERATURE AND PRECIPITATION OVERVIEW ...

The month of December saw a few very wet storm systems that brought well above average precipitation to northern Arizona. The first two storm systems were relatively warm with only the highest mountains receiving snowfall, while the third system arriving Christmas Eve brought heavy snow to many areas above the 4000 foot elevation level. A few places ranked among one of the 10 wettest Decembers on record. Temperatures were generally warmer than average, especially overnight low temperatures.
