

Guide

Step 1 – Activation

- Follow www.weather.gov/gyx or <https://www.weather.gov/erh/coastalflood?wfo=gyx>
- Activate when any Coastal Flood Statement, Advisory or Warning is issued / look at tide charts or flood forecast points for high tide

Step 2 – What To Report

- Erosion – Beaches, Rock Debris
- Inundation – Roads, Homes, Parking Lots (Water Depth if Possible)
- Damage – Road damage and/or structural damage

Step 3 – How to Report

- Who - You are (Name and Spotter #)
- What - You experienced (observation/damage)
- Where – The event occurred (your home or street address)
- When – The event occurred (Exact time of observation not when reported to the NWS)

Step 4 – How to Contact the NWS

- Toll Free Weather Spotter Reporting Number (no pictures)

1-800-482-0913

- Online Submit Storm Report Website (no pictures)
- <https://inws.ncep.noaa.gov/report/>

The screenshots show the NOAA Storm Reports website interface. The first screenshot shows the 'Report Type' dropdown menu with 'Flooding' selected. The second screenshot shows the 'Location' and 'Date' input fields. The third screenshot shows the 'Details' section with a map and a description of the flooding event. The fourth screenshot shows the 'Review and Send' section with a summary of the report and a 'Send Report' button.

- Email Reports – send videos and pictures to

gyx.skywarn@noaa.gov

- Report via Social Media NWS Feeds
- NWS Gray will ask for damage posts, can reply to post with damage pictures and reports, don't forget your Spotter ID in the post!
