## Storm Data and Unusual Weather Phenomena

June 1999

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage		Character of Storm
					Killed	Injured	Property	Crops	

### CALIFORNIA, South Central

#### Madera County

8 SE Madera to 8.2 SE Madera	02	1723PST			0	0			<b>Funnel Cloud</b>
---------------------------------	----	---------	--	--	---	---	--	--	---------------------

Short-lived funnel spotted within line of convective activity by trained spotter

#### Fresno County

5 NNW (Fat) Air Termi 10 N (Fat) Air Terminal	02	1750PST 1830PST			0	0	4.7M	<b>Small Hail</b>
--	----	--------------------	--	--	---	---	------	-------------------

While not meeting severe thunderstorm criteria, a line of late spring thunderstorms ran across north-central Fresno and to the east of Fresno. Hail just less than 3/4-inch in diameter was deposited to the depth of 2 inches accompanied by gusty wind to at least 30 MPH and locally heavy rain bringing widespread street flooding. Some power outages were reported throughout the Fresno City north and east sides from a line of thunderstorms that passed through the area from just before 7 PM PDT to half-past the hour. Spotters reported rainfall rates of 0.60 inches in 15 minutes in north-central Fresno...overall precipitation varied from 3/4-1 inch of rain over a 2-hour period along the storms' paths. Agriculture sustained damage from the hail with foilage and blossoms stripped on vines, and fruit and nut crops damaged from 10 to 100 percent in locations north, east, and southwest to southeast of Fresno. The damage figure is estimated for all of Fresno County, including the hail from the southwest-to-southeast of Fresno.

#### Fresno County

4 W Easton to 3 NW Fowler	02	1800PST 1815PST			0	0		<b>Small Hail</b>
------------------------------	----	--------------------	--	--	---	---	--	-------------------

While not meeting severe thunderstorm criteria in hail size, the intolerance of local agriculture to any hail during the growing season led to damage among nut crops, stone fruit, and vineyards. The hail was reported just less than 3/4-inch.

#### Kern County

4 S Mettler to 4.5 S Mettler	29 30	1200PST 2359PST			0	0		<b>Wild/Forest Fire</b>
---------------------------------	----------	--------------------	--	--	---	---	--	-------------------------

Digier Fire. Burned 350 acres in the far south end of the San Joaquin Valley. No structures were lost and there were no injuries. Cost to contain the blaze by 7/1/99 unknown.
