

Current Operations Level

Forecast Details

July 6, 2024
4:57 AM

- Low chances (10-20%) for showers and thunderstorms this weekend
- Daily high temperatures continue to peak in the low- to mid-90s today through Tuesday
 - Heat index values reach 100-105 F on Monday and Tuesday outside of any rain and thunderstorms
- Tropical Storm Beryl will bring heavy rain and some thunderstorms to the TN Valley early next week (60-70% chance)
 - Current forecast is for rainfall up to 2-3 inches in some areas Tuesday to Wednesday
 - No tropical storm- or hurricane-force winds are forecast for the TN Valley

Tropical Storm Beryl Update

July 6, 2024
4:57 AM

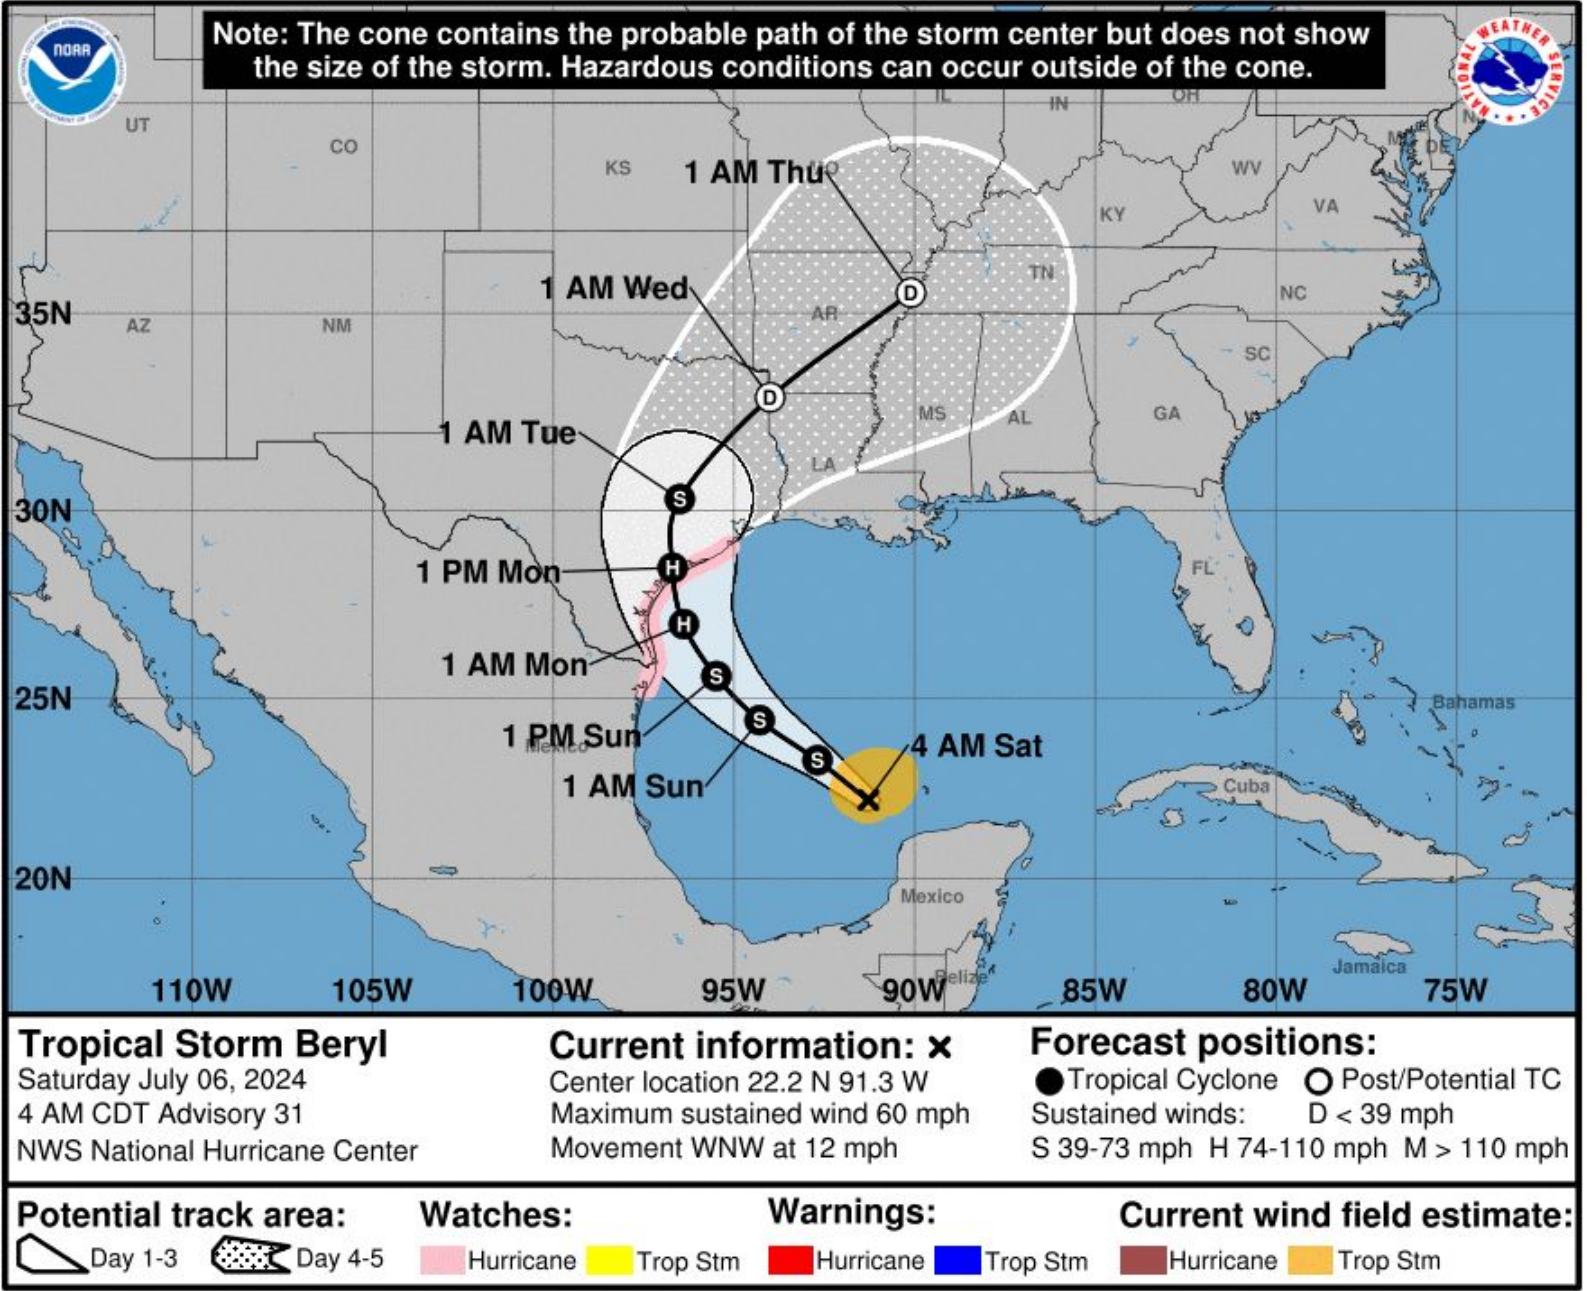

Forecast Details

- Beryl has weakened into a Tropical Storm, but should intensify back to Hurricane level before making landfall along the Texas coastline
- No hurricane or tropical storm-speed winds are forecast for the TN Valley
- Heavy rain and thunderstorms (60-70% chance) will be the primary impacts for the TN Valley Monday through Wednesday

Important Forecast Changes

The track has shifted northward, increasing rain and thunderstorm chances for the TN Valley early next week
