

Routine Weather Briefing

July 5, 2024
10:00 AM

Outlook Period: Friday 07/05/24 - Sunday 07/07/24

OVERVIEW:

Unseasonably hot and humid through Saturday with slight relief on Sunday.
Scattered showers and thunderstorms Saturday and Sunday, especially inland.

HAZARDS & IMPACTS

Land:

- Heat indices will exceed 105 degrees on Friday and Saturday. Saturday's thunderstorms may produce heavy rainfall.

Beach/Surf:

- Rip currents will remain in the Moderate to High range at east-facing area beaches as Hurricane Beryl swells weaken, but persist.

Coastal Flood:

- Minor coastal flooding possible this evening and Saturday evening along the Lower Cape Fear River during high tide.
