

Routine Weather Briefing

July 3, 2024
7:30 AM

Outlook Period: Wednesday 07/03/24 - Sunday 07/07/24

OVERVIEW:

High pressure off the coast will bring increasing heat and humidity through the weekend. A cold front may bring scattered thunderstorms Saturday and Sunday as it stalls to our west.

HAZARDS & IMPACTS	<p><u>Land:</u></p> <ul style="list-style-type: none"> Heat indices may exceed 105 degrees Friday and Saturday and maybe Sunday. <p><u>Beach/Surf:</u></p> <ul style="list-style-type: none"> Rip currents will remain in the Moderate to High range as swell energy from distant Hurricane Beryl increases at east facing area beaches.
