The Seneca Creek at Dawsonville crested at 7.95 feet. Bankful level is 7.5 feet.

An area of showers and thunderstorms with very heavy rainfall moved across western and central Maryland during the early morning hours of the 7th. The heaviest rain fell across western Allegany County where flash flooding was reported. The hardest hit area included Westernport, McCoole, Barton, and Rawlings. Streets and low lying areas became makeshift rivers as creeks overflowed their banks. Four homes received major damage and more than 40 basements were flooded. Flooded or damaged roads included Route 220 (McMullen Highway), Llewelyn Avenue, Tri-Towns Plaza Road, and George's Creek Road. A rock slide was reported on Route 135 in Westernport. The following streets in Westernport were damaged by flooding: Lincoln, Main, Central, McKinley, Wood, Poplar, Stoney Run, Potomac Hollow, Walnut, and Hickory. Several bridges leading to private property from McMullen Highway were washed out or damaged. Yard flooding, minor exterior damaged, or erosion was reported on properties along the following roads: Biddle Drive, McMullen Highway, Ketterman Lane, Abbey Lane, Red Rock Lane, McKinley Street, Gordon Street, Wood Street, Church Street, Greene Street, Creekside Drive, Mill Run Road, New George's Creek Road, Mt. Spring Road, and Donna Street. George's Creek near Westernport rose above the flood stage of 8.0 feet at 3:45 AM EDT, crested at 9.19 feet at 4:45 AM, and dropped below food stage by 600 AM. Rainfall totals included 4.9 inches at George's Creek near Westernport, 4.1 inches at McCoole Pumping Station, 3.2 inches at Biers Lane and Savage River Dam, 2.6 inches at the Oldtown Treatment Plant, 2.37 inches in Frostburg, and 2.3 inches at Wrights Crossing Pump Station.

In Washington County, rainfall totals included 3.41 inches in Knoxville and 2.63 inches in Sharpsburg. In Montgomery County, rainfall totals included 2.64 inches in Olney, 2.56 inches in Washington Grove, 2.42 inches in Gaithersburg, 2.22 inches in Potomac, 2.15 inches in Rockville, and 2.12 inches in Damascus. A spotter in Chevy Chase recorded nearly one half inch of rain in 5 minutes. The deluge caused Seneca Creek at Dawsonville to overflow its banks between 715 AM and 700 PM EDT. Bankful stage is 7.5 feet and the river crested at 7.95 feet around 9 AM. In Howard County, 2.60 inches was reported in Laurel and 2.20 inches fell in Columbia. In Anne Arundel County, heavy rain flooded Brock Bridge Road near Laurel, Fontron Drive in Selby on the Bay, King George Street in Annapolis, and Defense Highway near Parole. Rainfall totals included 2.16 inches at Davidsonville, 2.10 inches in Annapolis, and 1.76 inches at Baltimore-Washington International Airport. In Prince George's County, minor flooding was reported in Seat Pleasant and on Martin Luther King Highway. Rainfall totals include 2.22 inches in South Bowie and 2.00 inches in Greenbelt.

The roof of a house caught fire after lightning struck the building

#### Prince George'S County

Lanham	20	2100EST			0	0	0.50K		Thunderstorm Wind
--------	----	---------	--	--	---	---	-------	--	-------------------

Two downed trees blocked Cipriano Road.

Scattered thunderstorms that produced damaging winds, heavy rainfall, hail, and frequent lightning moved through the area between 8 and 11 PM EDT on the 20th. In Montgomery County, lightning struck an apartment complex in Gaithersburg and started a fire that displaced 80 people. The complex sustained 2 million dollars in damage. Pea sized hail was reported in Rockville. In Howard County, trees and power lines were downed in Ellicott City. In Baltimore County, high winds downed power lines and 100 trees across the city of Baltimore. Over 15,000 city customers lost power during the storm. In Cantonsville, lightning struck a home and started the roof on fire. In Prince George's County, two trees were downed across Cipriano Road. Marble sized hail was reported in Lanham.

Nickel to quarter sized hail fell.

#### Howard County

West Friendship	21	1720EST			0	0	2K		Thunderstorm Wind
-----------------	----	---------	--	--	---	---	----	--	-------------------

Trees were downed onto roads.

Thunderstorms that produced damaging winds, frequent lightning, large hail, and heavy downpours moved across central Maryland between 400 PM and 830 PM EDT on the 21st. In Frederick County, homes were damaged by lightning in Frederick, Green Valley, and New Market. High winds downed trees onto wires and roadways in the Frederick, Ballenger Creek, New Market, and Green Valley areas. In Howard County, trees were downed onto roads in West Friendship. In Prince George's County, nickel to quarter sized hail was reported in Laurel. A power pole was downed across the intersection of Cherry Lane and Van Dusen Road just north of Laurel Lake. Heavy rainfall caused Indian Creek to overflow its banks. Route 1 at Indian Creek was flooded. A culvert leading to Laurel Lake was also overwhelmed with runoff and overflowed.

reported 2 inches of rainfall in 20 minutes. At Point of Rocks, the railroad crossing on Route 28 was flooded. A three story mansion was struck by lightning and the resulting fire caused \$300,000 damage. Another lightning fire in Kempton caused \$20,000 damage. In Carroll County, some roads and low lying area were flooded in the Westminster and Melrose areas. Rainfall totals included 4.05 inches in Manchester and 2.41 inches in Westminster. Gunpowder River overflowed west of Linesboro. Rushing water downed power lines in the northern part of the county. Lightning started a garage on fire and \$70,000 damage was reported.

In Montgomery County, heavy rainfall caused roads to flood so quickly that three people had to be rescued from their cars. The hardest hit areas were in the vicinity of Olney, Wheaton, and Brighton Dam. Numerous roads had to be closed until the water subsided including Brighton Dam Road, Emory Lane, Muncaster Mill Road, Route 97, and West Willow Road. Route 97 was closed after the Hawlings River overflowed just north of Brookville. Rainfall totals included 5.00 inches in Brookville, 4.72 inches in Olney, 4.67 inches in Aspen Hill, 4.00 inches at Brighton Dam, 3.27 inches in Layhill, 2.68 inches in Potomac, and 2.46 inches in Bethesda. In Poolesville, a man was burned on his face as he tried to put out a lightning fire in a three story mansion. A garage with several vintage cars also caught fire after lightning hit the structure. In Howard County, high water closed Brighton Dam Road, Guilford Drive, Route 108, Route 216, Sheppards Lane, Green Bridge Road, Woodstream Drive, Old Frederick Road, Carrs Mill Road, Bethany Lane, Cedar Lane, Route 29, and Old Columbia Road. North Trotter Road was washed out by the Middle Patuxent River. Several people had to be rescued from their vehicles after roads quickly flooded. A mudslide closed Marriottsville Road in Ellicott City. Rainfall reports included an estimate of 5 inches just northeast of Clarkesville, 4.10 inches in Clarkesville, and 3.30 inches in Cooksville. In Harford County, heavy rain fell mainly across the far eastern portion of the county. Up to 7 inches of rainfall was reported at the Conowingo Dam on the Susquehanna River. Minor flooding was reported near Havre de Grace.

A microburst estimated at 60-70 MPH damaged a home, carport, shed, car, and trees.

Scattered thunderstorms moved across the central Shenandoah Valley between 300 and 530 PM EDT on the 6th. One storm that moved across Rockingham and extreme southern Page County produced winds in excess of 55 MPH. In Rockingham County, power lines were downed in Harrisonburg and Port Republic. In Page County, a microburst of wind estimated between 60 and 70 MPH damaged several buildings in Jollett Hollow about 5 miles east of Shenandoah. The wind damage began at a small clearing adjacent to Jollett Road (Route 759) just south of Naked Creek Baptist Church. The damage path continued northeast onto private property where part of a roof was blown off a home and a car port was removed from its foundation. Pieces of the structure were thrown east about 100 yards onto the roof of a home. Several trees were uprooted and several outbuildings were destroyed nearby. In Greene County, heavy downpours caused low water crossings on Route 616 and 607 to flood in the southeast portion of the county.

13	1800EST								

High pressure in combination with southerly winds brought hot, hazy, and humid conditions to the Mid Atlantic region between June 12th and 13th. High temperatures soared to around 90 degrees and heat indices reached near 100 degrees through the period. At Arlington National Cemetery, eight 14-year-old tourists were overcome by the heat and humidity during the afternoon of the 12th. Two students had to be treated at an area hospital and six others were treated on-site.

-----------------	----	--------------------	--	--	---	---	----	--	-------------------

Trees and power lines were downed.

Scattered thunderstorms that produced damaging winds, hail, and frequent lightning moved through the area between 5 and 11 PM EDT on the 20th. In Frederick County, high winds downed electrical wires onto Main Street in Middletown. Between Middletown and Stephens City, a house on Meeting House Drive caught on fire after being struck by lightning. In Warren County, several trees were downed in Front Royal. A wind gust of 47 MPH was recorded at Catlett Mountain Road just southwest of town. In Madison County, two trees were downed across Route 231. In Greene County, quarter sized hail fell just east of Standardsville.

In Albemarle County, trees and power lines were downed onto roads from the city of Charlottesville westward. The Crozet, White Hall, Ivy Road, and Mount Eagle areas reported power outages. A lightning strike 8 miles west of Charlottesville struck a telephone wire outside a home, traveled inside the structure and struck a young man inside. The man was in his basement talking on a cordless phone when he was struck and was momentarily knocked unconscious. He woke up on the basement floor on his back and his damaged phone was found 5 feet away. The victim had trouble breathing when he regained consciousness and his ear hurt. He suffered short term memory loss up to 3 weeks after the accident. It is believed the victim was struck by the bolt as it passed through pipes in the basement floor.

	22	0100EST							

Roads were flooded in the town of Orange.

Thunderstorms that produced damaging winds and very heavy downpours moved across northern Virginia between 7 PM EDT on the 21st through 2 AM EDT on the 22nd. In Shenandoah County, numerous trees were downed in the southern portion of the county, including the community of Conicville. High winds ripped three quarters of a tin roof off a mobile home on Port Republic Road north of Grottoes. The remains of the tin roof were rolled into a ball and thrown 50 feet from the structure. A few trees were downed near the home but neighbors nearby did not report any damage. Heavy downpours flooded portions of Routes 611, 701, 724, 691, 672, 675, 1419, 667, 663, and 600. The Shenandoah River and Stoney Creek overflowed their banks in a few locations. A total of 3.04 inches of rain was reported at Jerome Gap. In Warren County, a wind gust of 53 MPH was recorded on Catlett Mountain Road. Trees were downed in the vicinity and a plane was damaged at the Warren County Airport nearby. In Page County, 3.67 inches of rain was reported at Rocky Branch, 2.14 inches was reported at Skyland, and 2.05 inches fell at Ida. In Augusta County, a total of 3.94 inches of rain fell at Montebello and 2.86 inches fell at Tom's Branch. In Nelson County, 2.87 inches of rain was recorded at Montebello Fish in 60 minutes. By the end of the storm the total grew to 3.70 inches. In Albemarle County, high winds downed utility lines on Proffit Road near Polo Grounds Road. Power outages were reported in Charlottesville. In Orange County, heavy rainfall flooded roads in the town of Orange. Between the 20th and 22nd, portions of the county received up to 4 inches of rain.

Glebe Road was flooded.

During the afternoon of the 22nd, numerous showers and thunderstorms developed just east of the Appalachian Mountains. The storms trained to the North-Northeast along the mountain ridges before moving very slowly east through midnight. These storms contained very heavy rainfall, large hail, frequent lightning, and occasionally produced high winds. Widespread flooding was reported in several locations and the storms were responsible for over a million dollars in damage across Northern Virginia. In Frederick County, the worst flash flooding occurred across the western portion of the county. The hardest hit areas were in the Back Creek and Hogue Creek watersheds between Gore and Shawneeland where rainfall estimates were as high as 6 inches. Camp Rock Enon near Gore had to be evacuated when Back Creek started to flood the property and Back Creek Road. Highways closed or damaged by floodwaters included Route 50 between 615 and 614, 600, 613, 612, 704, 603, 679, 608, and 617. The only access road to the Shawneeland development which contains over 600 homes was washed out when Wolf Spring, Keckey, and Bucher Runs overflowed. Boulders weighing as much as 200 pounds and 36-inch culverts were washed more than a quarter mile downstream from the access road. Due to the extent of countywide damage and road closures, a state of emergency was declared. A total of 2.21 inches of rain was reported in Gore. Dime sized hail was reported 6 miles northwest of Winchester on Route 522. In addition, two homes in Shawneeland were damaged by lightning. An emergency communications tower on North Mountain was also struck and disabled by lightning.

In Shenandoah County, severe flooding was reported after as much as an estimated 6 inches of rain fell. Over half a million dollars in damage was reported to roads and bridges across the county. Numerous communities were affected by flooding including Mt. Jackson, Boyce, Orkney, Mt. Clifton, Rinkerton, Macanie, and Woodstock. Waterways including the Shenandoah River, Stoney Creek, Swover Creek, and Mill Creek rose rapidly during and after the heavy rainfall. A house, outbuilding, and shed along Mill Creek near Route 263 were washed away and another house had its front porch removed. Four unoccupied cars were also washed downstream. Several acres of crops along the river were flattened and topsoil was washed away. Seven people in the area were evacuated and several homes reported flood damage. A propane tank was washed 100 yards down Mill Creek west of Mt. Jackson. Roads closed or damaged by floodwaters included Senedo Road, Routes 611, 691, 698, 701, 716-724, 729, and Route 263 between Routes 42 and 725. A total of 3.60 inches of rain was reported in Strasburg.

In Rockingham County, numerous roads and bridges were either flooded or washed out by flash flooding. Hardest hit areas were along Fulks Run between the communities of Bergton and Broadway where 20 evacuations took place. The Hanging Rock, Chimney Rock, and the Runions Creek area were also affected by flooding. Damage reports included one destroyed mobile home, numerous washed out private bridges and roads, parked cars washed into the river, and the bridge on Route 259 across Runions Creek at the North Fork of the Shenandoah River being completely washed away. The pavement was removed on Runions Creek Road (Route 612) isolating over 600 residents. Twenty evacuations took place along Runions Creek. Other flooded or damaged roads included Routes 259 and 42. Rainfall reports included a radar estimate of 6 inches in the Fulks Run basin, 3.50 inches between Burgess and Highview and 2.95 inches at Cootes Store.

In Warren County, Morgan's Ford Road and Freezeland Road were flooded in the northwest portion of the county. A total of 3.77 inches was recorded in Nineveh. In Loudoun County, heavy rain flooded roads so quickly that three people had to be rescued by boat from their cars. Roads affected by flooding included Route 7, Route 663, Route 15 at Route 662, Route 50, Lawson Road, Old Ox Road (Route 606), Goshen Road, Forest Mill Road, Ashburn Road, Waxpool Road, and Belmont Ridge Road (Route 659). Several basements and low lying areas were also flooded. Limestone Branch, Broad Run, and Tuscarora Creek overflowed their

### VIRGINIA, North

banks. The rapidly rising water downed trees and flooded property and roads along the waterways. A spotter in Ashburn reported 5.10 inches of rainfall in 90 minutes in addition to pea to dime sized hail. A spotter in Arcola estimated up to 8 inches of rain fell in two hours. Additional totals included 5.94 inches near Ashburn, 4.70 inches in Ashburn Farm, 4.04 inches in Leesburg, 3.78 inches at the National Weather Service in Sterling, 3.25 inches in Sterling Park, and 2.09 inches at Dulles International Airport. Heavy rainfall that collected on the roof of the Sheriff's office in Leesburg was so heavy it caused a portion of the roof to collapse. A 60 MPH wind gust was estimated in Ashburn Farm where a few trees were uprooted or snapped. Near Arcola, winds estimated between 60 and 70 MPH downed power lines and hundreds of trees, damaged 6 homes, and destroyed 4 barns/machine sheds. The hardest hit areas were along Evergreen Mills and Belmont Ridge Roads, but downed trees were found across an area stretching from Route 606 to 621.

In Fairfax County, water covered Route 7 between Reston Parkway and Route 193. Difficult Run overflowed its banks in the Great Falls area. Two parks located in the southwest portion of the county were flooded after Bull Run and Cub Run overflowed. A campground in Bull Run Regional Park on the Prince William county line was inundated with water from Cub Run. Over 70 campers evacuated when they saw the water rising but a group of 25 scouts that were asleep and unaware of the flooding were awakened after water seeped into their tents after midnight. The group moved to higher ground and had to wait a few hours until the water receded enough to make a rescue possible. Five to seven cars in the campground parking lot were damaged by flooding. Rainfall totals included 3.80 inches in Centreville, 3.45 inches in Reston, 3.25 inches in Clifton, 2.40 inches in Herndon, and 2.34 inches in Great Falls. A home in Springfield was damaged by a lightning fire. In Arlington County, Glebe Road was flooded in Arlington. In Falls Church, 2.23 inches of rain was recorded. In Prince William County, several roads were flooded. A total of 2.68 inches fell in Manassas where quarter sized hail was also reported. In Fauquier County, high winds downed trees in the Marshall area. A wind gust of 40 MPH was estimated in Opal. Pea sized hail fell near Warrenton. In Culpeper County, two trees were downed by high winds in the western portion of the county. In Nelson County, roads near Nelson County High School in Lovingston were flooded. Rainfall totals included 4.98 inches at Montebello Fish and 2.85 inches in Lovingston.

Trees and power lines were downed onto roads, cars, and a fence.

Scattered thunderstorms that produced damaging winds, hail, and heavy rainfall moved through the area between 2 and 5 PM on the 20th. In Hardy County, pea sized hail was reported. A total of 1.9 inches of rain fell in just over an hour in Moorfield. In Hampshire County, nickel sized hail was reported in Romney. In Berkeley County, winds in excess of 60 MPH downed or snapped trees up to 2 feet in diameter and felled power lines in Martinsburg. Twenty trees at War Memorial Park were either snapped at the base or lost several large limbs. Six more trees had to be removed because the storm made them unstable. Other downed trees and power lines were strewn across city driveways, lawns, roads, and a few homes. A partial list of damaged areas included Locust Avenue, Louisiana Avenue, Delaware Street, and Martin Street.

Route 259 was closed by high water between Baker and Broadway.

During the afternoon of the 22nd, numerous showers and thunderstorms with heavy rainfall and frequent lightning developed just east of the Appalachian Mountains. These storms continued to affect the eastern panhandle through the evening hours and some roads, low water crossings, and waterways flooded. In Pendleton County, rainfall totals included 2.42 inches on Middle Mountain and 2.18 inches on Cow Knob Mountain. In Grant County, a total of 3.92 inches of rain fell at Cave Mountain. In Hardy County, high water closed Route 259 between Baker and Broadway. A total of 3.28 inches fell at Devils Hole. In Mineral County, New Creek overflowed onto Route 972. In Jefferson County, 2 inches of rain fell in one hour near Harpers Ferry. A total of 1.83 inches was recorded on Summit Point.
