## Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/16/07 05:00 EST		10K	High Wind (MAX 50 kt)
	04/16/07 18:00 EST		0	

A Nor'Easter impacted the Mid Atlantic region on April 15th and 16th. Low pressure off the southeastern coast moved north along the Delmarva. Heavy rain spread north across the region early April 15th, causing flooding by the afternoon and evening. Winds increased as the low pressure area pushed north and intensified, downing trees and power lines across the District.

### MARYLAND, Central

#### WASHINGTON (MD-Z003), EXTREME WESTERN ALLEGANY (MD-Z501), CENTRAL AND EASTERN ALLEGANY (MD-Z502)

A Nor'Easter impacted the Mid Atlantic region on April 15th and 16th. Low pressure off the southeastern coast moved north along the Delmarva. Heavy rain spread north across the region early April 15th, causing flooding by the afternoon and evening. Winds increased as the low pressure area pushed north and intensified, downing trees and power lines across northern and central Virginia.

Unseasonably colder air moved over the eastern Pan Handle of West Virginia on April 4th and remained through April 10th. Clear skies and light winds overnight allowed temperatures to fall into the mid 20s to lower 30s. Due to warmer temperatures at the end of March, many crops and gardens began to bloom early, before the established growing season.

<b>WESTERN GRANT (WV-Z501), WESTERN MINERAL (WV-Z503)</b>				

## Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>WESTERN GRANT (WV-Z501), WESTERN MINERAL (WV-Z503)</b>				
	04/16/07 12:00 EST		0	Heavy Snow
	04/17/07 05:00 EST		0	

A Nor'Easter impacted the Mid Atlantic region on April 15th and 16th. Low pressure off the southeastern coast moved north along Delmarva. Heavy rain spread north across the region early April 15th, causing flooding by the afternoon and evening. As the low pressure area pushed north and intensified, colder air advanced from the northwest. This allowed rain to change to snow along the upslope region of the Allegheny Front and Potomac Highlands. Winds also increased in the wake of the low, downing trees and power lines across the eastern pan handle.
