04/11/08 22:08 EST	0	Source: Buoy

The buoy at Thomas Point Light measured a wind gust of 44 knots.

---

#### CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- 12.8 NW ARNOLD [39.16, -76.63]

04/11/08 22:14 EST	0	Marine Thunderstorm Wind (EG 34 kt)
04/11/08 22:14 EST	0	Source: Mesonet

A mesonet observation at Anne Arundel County Club in Glen Burnie estimated a wind gust of 34 knots.

---

#### CHESAPEAKE BAY POOLIS IS TO SANDY PT MD COUNTY --- TOLCHESTER BEACH [39.20, -76.24]

04/11/08 22:18 EST	0	Marine Thunderstorm Wind (EG 34 kt)
04/11/08 22:18 EST	0	Source: Mesonet

The buoy at Tolchester Beach reported a wind gust near 34 knots.

**A warm front moved north of the region April 11th. Scattered showers and thunderstorms developed in the wake of the warm front in advance of a strengthening cold front to the west. These storms moved east of the Tidal Potomac and Maryland Chesapeake Bay, producing wind gusts between 30 and 45 knots.**

---

#### CHESAPEAKE BAY N BEACH TO DRUM PT MD COUNTY --- COVE POINT [38.43, -76.39]

04/12/08 13:12 EST	0	Marine Thunderstorm Wind (EG 34 kt)
04/12/08 13:12 EST	0	Source: Buoy

The buoy at Cove Point reported a wind gust in excess of 30 knots.

---

#### CHESAPEAKE BAY DRUM PT TO SMITH PT VA COUNTY --- SOLOMONS ISLAND [38.32, -76.45]

04/12/08 13:18 EST	0	Marine Thunderstorm Wind (EG 34 kt)
04/12/08 13:18 EST	0	Source: Buoy

The buoy at Solomons Island reported a wind gust in excess of 30 knots.

**A strong cold front crossed the region April 12th, triggering scattered showers and thunderstorms over portions of the Washington DC and Baltimore metros. These storms moved east of the Tidal Potomac and Maryland Chesapeake Bay, producing wind gusts in excess of 30 knots.**

---

#### TIDAL POTOMAC KEY BRIDGE TO INDIAN HD MD COUNTY --- 0.2 NE RONALD REAGAN NATL ARPT [38.85, -77.04]

04/20/08 13:23 EST	0	Marine Thunderstorm Wind (EG 34 kt)
04/20/08 13:35 EST	0	Source: ASOS

The ASOS at Reagan National Airport reported a wind gust near 34 knots.

---

#### CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- TOLLY POINT [38.94, -76.44]

04/20/08 16:58 EST	0	Marine Thunderstorm Wind (MG 40 kt)
04/20/08 16:58 EST	0	Source: Mesonet

The automated observation at Tolly Point measured a wind gust of 40 knots.

**A deep low pressure system moving east across the Great Lakes pushed a strong cold front across the region on late April 20th into early April 21st. Numerous strong to severe thunderstorms developed during the afternoon and evening hours across the region and continued into the following morning. These storms produced wind gusts in excess of 30 knots.**

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>TIDAL POTOMAC COBB IS MD TO SMITH PT VA COUNTY --- POTOMAC BUOY [38.03, -76.34]</b>				
	04/28/08 16:30 EST		0	Marine Thunderstorm Wind (MG 34 kt)
	04/28/08 16:30 EST		0	Source: Buoy

The Potomac Buoy measured a wind gust of 34 knots.

**A weak cold front crossed the Mid Atlantic on April 28th, triggering scattered showers and thunderstorms over the Tidal Potomac River and Maryland Chesapeake Bay. These storms produced wind gusts in excess of 30 knots.**

### DISTRICT OF COLUMBIA

<b>DISTRICT OF COLUMBIA COUNTY --- 0.8 SSE TENLEYTOWN [38.94, -77.07]</b>				
	04/11/08 21:30 EST		15K	Thunderstorm Wind (EG 50 kt)

## Storm Data and Unusual Weather Phenomena - April 2008

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>An NWS survey team confirmed a tornado just northeast of LaPlata in St Charles. The tornado touched down near the intersection of Renner Road and Route 5/Leonardtown Road, tracking north and damaging the eastern section of St Charles. The most damaged parts of the community were around Snowbell Court, Sweetbriar Place and Northgate Place. The damage included several large trees snapped and uprooted, some of which fell into houses and other vehicles. Several homes lost roofing and sections of siding. A large storage shed was shifted off its foundation and had some of its doors blown out.</p>

	04/20/08 13:27 EST		40K	Tornado (EF1, L: 0.32 mi , W: 100 yd)
	04/20/08 13:35 EST		0	Source: NWS Storm Survey
<p>An NWS survey team confirmed a tornado just west of Hyattsville in Chillum. The tornado touched down at a water park near the intersection of Sargent Road and Ray Road. Tree damage was noted at the water park. The tornado intensified as it crossed a wooded area and field behind the George E. Peters Adventist Elementary School. Peak winds estimated at near 100 mph then struck the school, lifting the northeast section of the roof and throwing most of it into the downwind parking lot. A construction office trailer was thrown on its side. Some debris from the school was carried high into nearby trees while some was blown into the Metropolitan Adventist Church across the parking lot, destroying some church windows. A piece of plywood was carried across Riggs Road into the Prince Georges County Fire Station 44, knocking out power. A science teacher in the school and a fireman at the station both reported seeing rotation as debris was carried by the wind. The storms continued north, downing trees along Riggs Road as well as a light pole in the parking lot of a shopping center.</p>

Frederick County Emergency Management reported roads closed in Lewistown.

**A deep low pressure system moving east across the Great Lakes pushed a strong cold front across the region on late April 20th into early April 21st. Numerous strong to severe thunderstorms developed during the afternoon and evening hours across the region and continued into the following morning. High moisture content and training storms lead to flooding across portions of the region with several road closures due to high water. Several storms produced damaging winds that downed trees and power lines. There were also two confirmed tornadoes in Charles and Prince Georges counties.**

An NWS survey team confirmed a tornado in Middletown. The tornado touched down on the grounds of an apple farm off Chapel Road. The team found damage to farm outbuildings and a large barn, including one farm outbuilding that was completely uplifted and destroyed with the remains deposited along a half mile path. Apple trees were uprooted, along with two pine trees and one hardwood tree snapped at the trunk approximately 15 feet from the ground. The metal roof of a large barn and the metal roof of a small outbuilding were peeled back in opposite directions despite being along the same damage path. Several ten pound weights were picked up and deposited 40 yards away from where they were originally located in the outbuilding that was completely uplifted. An oak measuring 6 feet in diameter and set 3 feet into the ground served as a structural foundation for the destroyed outbuilding was completely and cleanly removed from the ground and deposited 400 yards away.
