Wind gusts up to 41 knots were reported at Cove Point.				
<b>PATUXENT RIVER TO BROOMES ISLAND MD COUNTY --- 0.8 SSW PATUXENT RIVER ASOS [38.28, -76.41]</b>				
	07/13/10 20:09 EST	0		Marine Thunderstorm Wind (EG 34 kt)
	07/13/10 20:09 EST	0		Source: ASOS
A wind gust in excess of 30 knots was reported at Patuxent River.				

## Storm Data and Unusual Weather Phenomena - July 2010

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A return flow around high pressure over the western Atlantic was responsible for hot and humid conditions. An upper-level disturbance combined with the hot and humid conditions to trigger showers and thunderstorms over the Tidal Potomac River and Chesapeake Bay. An isolated thunderstorm produced gusty winds.

	07/14/10 01:37 EST	0	0	Marine Thunderstorm Wind (MG 36 kt)
	07/14/10 01:37 EST	0	0	Source: Mesonet

A wind gust of 36 knots was reported at Bishops Head.

A trough of low pressure slowly passed through the waters on the 14th. Showers and thunderstorms were associated with the trough, and there was enough instability for some thunderstorms to produce gusty winds.

---

**PATUXENT RIVER TO BROOMES ISLAND MD COUNTY --- 0.8 SSW PATUXENT RIVER ASOS [38.28, -76.41]**

	07/16/10 17:52 EST	0	0	Marine Thunderstorm Wind (EG 40 kt)
	07/16/10 17:53 EST	0	0	Source: ASOS

Wind gusts up to 40 knots were reported near Patuxent River.

---

**CHESAPEAKE BAY DRUM PT TO SMITH PT VA COUNTY --- 2.0 NE PATUXENT RIVER ASOS [38.31, -76.38]**

	07/16/10 17:54 EST	0	0	Marine Thunderstorm Wind (EG 40 kt)
	07/16/10 17:54 EST	0	0	Source: Unknown

A wind gust of 40 knots was estimated near Patuxent River.

High pressure over the western Atlantic pumped in plenty of warm and humid air over the waters on the 16th. A weak upper-level disturbance in the zonal flow aloft triggered showers and thunderstorms. A couple thunderstorms produced gusty winds.

---

**CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- 0.2 SE GREENBERRY POINT [38.97, -76.46]**

	07/17/10 00:04 EST	0	0	Marine Thunderstorm Wind (MG 40 kt)
	07/17/10 00:10 EST	0	0	Source: Mesonet

Wind gusts up to 40 knots were reported at Greenbury Point.

---

**CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- 0.4 SE TOLLY POINT [38.94, -76.44]**

	07/17/10 00:14 EST	0	0	Marine Thunderstorm Wind (EG 34 kt)
	07/17/10 00:14 EST	0	0	Source: Mesonet

A wind gust in excess of 30 knots was reported at Tolly Point.

High pressure over the western Atlantic continued to usher in hot and humid air due to a southwest flow. An upper-level disturbance in the zonal flow triggered showers and thunderstorms across portions of the Tidal Potomac River and Chesapeake Bay. Moderate amounts of instability due to the hot and humid air mass caused some thunderstorms to produce gusty winds.

Edgewood Road at the CSX Railroad Overpass was flooded and closed. A spotter near the event reported 3.75 inches of rain in 2.5 hours.

Low pressure moved east toward the Chesapeake Bay during the early morning, encountering a very moist low-level atmosphere. Lift was sufficient to produce thunderstorms, a series of which trained across southern Harford county for several hours, producing 2-4 inches of rain and a report of flash flooding.

## Storm Data and Unusual Weather Phenomena - July 2010

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>A pressure trough remained over Maryland on the 12th while an upper-level disturbance passed through in a zonal flow aloft. The forcing from these two systems were responsible for the development of showers and thunderstorms. As thunderstorms passed across the Baltimore metropolitan area during the afternoon locally heavy rainfall of 1 to 2 inches produced minor street flooding.</p>

<b>CALVERT COUNTY --- 1.3 E PARIS [38.70, -76.56]</b>	07/13/10 20:10 EST		2K	Thunderstorm Wind (EG 52 kt)
	07/13/10 20:10 EST		0	Source: Emergency Manager
Trees were down on power lines near Route 260 and Harrison Boulevard.				
<p>A surface trough remained over the area triggering showers and thunderstorms on the 13th. An upper-level disturbance moved into the area in the zonal flow aloft. The upper-level disturbance combined with an abundant amount of low-level moisture to produce moderate amounts of instability. Some thunderstorms became severe with damaging winds.</p>				
<hr/>				
<b>BALTIMORE COUNTY --- 1.8 ENE OELLA [39.28, -76.75], 1.3 ENE OELLA [39.28, -76.76], 1.3 SE BELMONT [39.29, -76.76], 1.5 SW CHADWICK MANOR [39.28, -76.75]</b>	07/14/10 00:15 EST		0	Flash Flood (due to Heavy Rain)
	07/14/10 01:15 EST		0	Source: Law Enforcement
Vehicle stranded in flowing water on North Rolling Road near the Baltimore National Pike. Trained spotter in the area measured storm total precipitation of 5.27 inches.				
<p>A surface trough combined with an upper-level disturbance to trigger showers and thunderstorms over the area overnight on the 13th into the morning of the 14th. With ground already saturated from numerous rounds of rainfall over the past few days, heavy downpours from thunderstorms created flash flooding in the Baltimore metropolitan area.</p>				
<hr/>				
<b>ST. MARY'S COUNTY --- 0.7 SSE LEXINGTON PARK [38.26, -76.45]</b>	07/16/10 17:50 EST		0	Thunderstorm Wind (EG 50 kt)
	07/16/10 17:50 EST		0	Source: Trained Spotter
A trained spotter estimated a thunderstorm wind gust around 60 knots at Lexington Park.				
<p>High pressure over the western Atlantic pumped in plenty of warm and humid air over the region during the 16th. A weak upper-level disturbance in the zonal flow aloft triggered showers and thunderstorms across portions of Maryland. An isolated thunderstorm produced damaging winds.</p>

## Storm Data and Unusual Weather Phenomena - July 2010

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

A tree was down on Bel Alton Newton Road.

A strong upper-level disturbance and its associated cold front moved into Maryland on the 25th. Hot and humid conditions ahead of the front led to high amounts of instability. Showers and thunderstorms developed along and ahead of the cold front. Due to the high amounts of instability, thunderstorms were able to mix down strong winds from aloft causing significant amounts of damage across portions of Maryland.

Hanover Street at Harbor View Hospital was reported impassable due to high water. A spotter in the area measured 1.01 inches of rain.

<b>MONTGOMERY COUNTY --- 0.9 NE RANDOLPH HILLS [39.09, -77.12], 0.8 NNE RANDOLPH HILLS [39.09, -77.12], 1.0 NNE RANDOLPH HILLS [39.09, -77.13], 1.1 NNE RANDOLPH HILLS [39.09, -77.12]</b>				
	07/29/10 15:05 EST		0	Flash Flood (due to Heavy Rain)
	07/29/10 16:00 EST		0	Source: Emergency Manager

Maryland Route 28 was closed at Avery Road due to flooding. A spotter in the region observed 0.83 inches of rain.

**A cold front passed through Maryland on the 29th triggering showers and thunderstorms. Some of these thunderstorms produced locally heavy rainfall in a very brief period of time, triggering flash flooding in some urban areas.**

### VIRGINIA, North

<b>AUGUSTA COUNTY --- 0.8 SSW BURKETOWN [38.29, -78.94]</b>				
	07/08/10 22:00 EST		0.50K	Thunderstorm Wind (EG 50 kt)
	07/08/10 22:00 EST		0	Source: Fire Department/Rescue

A tree was down on the 4000 Block of Lee Highway.

**An upper-level low centered over the western Atlantic combined with a backdoor cold front to trigger showers and thunderstorms across portions of central Virginia. An isolated thunderstorm did produce damaging winds.**

<b>AUGUSTA COUNTY --- 0.7 NNW SANGERVILLE [38.39, -79.08]</b>				
	07/09/10 15:29 EST		0.50K	Thunderstorm Wind (EG 50 kt)
	07/09/10 15:29 EST		0	Source: Fire Department/Rescue

A tree was down on Wolf Ridge Road.

**An upper-level low remained over central Virginia along with a stationary boundary at the surface. The two features combined with plenty of low-level moisture to trigger showers and thunderstorms. An isolated thunderstorm did produce damaging winds.**

<b>FAIRFAX COUNTY --- 1.4 S TREMONT [38.83, -77.22], 1.4 S TREMONT [38.83, -77.22], 1.3 N RAVENSWORTH [38.82, -77.22], 1.4 N RAVENSWORTH [38.82, -77.22]</b>				
	07/14/10 00:15 EST		0	Flash Flood (due to Heavy Rain)
	07/14/10 01:15 EST		0	Source: Broadcast Media

The left lane of the inner loop of the Capital Beltway was closed due to deep standing water from Little Accotink Creek overflowing its banks. Trained spotter in the region measured 2.26 inches of rain.

**A surface trough combined with an upper-level disturbance to trigger showers and thunderstorms over the area overnight on the 13th into the morning of the 14th. With ground already saturated from numerous rounds of rainfall over the past few days, heavy downpours from thunderstorms created flash flooding the Virginia suburbs of the Washington metropolitan area.**

<b>FREDERICKSBURG (C) COUNTY --- 0.9 W FREDERICKSBURG [38.30, -77.49]</b>				
	07/16/10 17:53 EST		3K	Thunderstorm Wind (EG 50 kt)
	07/16/10 17:53 EST		0	Source: Fire Department/Rescue

Trees were down on seven streets around the city of Fredericksburg.

**High pressure over the western Atlantic pumped in plenty of warm and humid air over the region during the 16th. A weak upper-level disturbance in the zonal flow aloft triggered showers and thunderstorms across portions of central Virginia. An isolated thunderstorm produced damaging winds.**
