	04/05/11 09:11 EST	0		Source: Mesonet
A wind gust of 34 knots was reported at Greenberry Point.				
<p>A strong cold front slowly traced through the area during the morning hours of the 5th. A southerly flow ahead of the front caused copious amounts of moisture to move into the region from the Atlantic Ocean and Gulf of Mexico. The deep moisture combined with a mid-level trough that was associated with the cold front to produce moderate amounts of instability. Lift from the cold front along with moderate instability triggered showers and thunderstorms across the waters.</p> <p>Thunderstorms were able to mix down gusty winds from aloft.</p>				
TIDAL POTOMAC COBB IS MD TO SMITH PT VA COUNTY --- 0.3 NE POTOMAC BUOY [38.03, -76.34]

Wind gusts of 51 knots were reported at Chesapeake Beach.				
CHESAPEAKE BAY N BEACH TO DRUM PT MD COUNTY --- CHESAPEAKE BEACH [38.69, -76.54]				

Storm Data and Unusual Weather Phenomena - April 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/16/11 18:40 EST		0	Marine Thunderstorm Wind (MG 51 kt)
	04/16/11 19:09 EST		0	Source: Mesonet

Wind gusts up to 51 knots were reported at Chesapeake Beach.

Strong low pressure over the Midwest remained cutoff from the jet stream on the 16th. The warm front associated with this system passed through during the morning. Warm and moist southerly winds behind the front provided moderate amounts of instability. The instability combined with forcing from the low for showers and thunderstorms to develop.

There was enough instability for thunderstorms to mix down gusty winds from aloft.

PATAPSCO RIVER INCLUDING BALTIMORE HARBOR COUNTY --- 0.3 S BALTIMORE CITY [39.27, -76.59]

04/24/11 16:00 EST	0	Marine Thunderstorm Wind (MG 34 kt)

A wind gust of 36 knots was measured at Nationals Park.

CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- 0.3 S ANNAPOLIS [38.98, -76.48]

04/24/11 20:10 EST	0	Marine Thunderstorm Wind (MG 41 kt)
04/24/11 20:10 EST	0	Source: Buoy

A wind gust of 41 knots was reported at the Annapolis Buoy.

A southerly flow around high pressure over the Atlantic Ocean provided a warm and moist airmass across the region. A pressure trough combined with the warm and moist conditions to trigger showers and thunderstorms. There was enough instability for some thunderstorms to produce gusty winds across the waters.

TIDAL POTOMAC INDIAN HD TO COBB IS MD COUNTY --- 0.2 W POTOMAC LIGHT [38.34, -76.99]

04/26/11 17:00 EST	0	Marine Thunderstorm Wind (MG 36 kt)
04/26/11 17:00 EST	0	Source: Mesonet

A wind gust of 36 knots was reported at the Potomac Lighthouse.

A southerly flow around high pressure off the east coast transported plenty of moisture from the Gulf of Mexico and Atlantic Ocean across the area. The warm and moist southerly flow combined with a pressure trough to trigger showers and thunderstorms. Moderate amounts of instability caused a few thunderstorms to produce damaging winds and large hail. An isolated thunderstorm produced gusty winds.

CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- THOMAS POINT LIGHT [38.90, -76.44]

Storm Data and Unusual Weather Phenomena - April 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/27/11 19:00 EST		0	Marine Thunderstorm Wind (MG 35 kt)
	04/27/11 19:00 EST		0	Source: Buoy

A wind gust of 35 knots was reported at the Thomas Point Lighthouse.

High pressure remained over the western Atlantic while a strong cold front slowly tracked through the Midwest. A southerly flow pumped in copious amounts of moisture from the Atlantic and Gulf of Mexico. The trough of low pressure associated with the cold front provided enough cold air aloft for moderate instability to develop. The instability combined with an upper-level disturbance rotating around the trough to trigger showers and thunderstorms.

There was enough instability along with stronger winds aloft for some thunderstorms to produce gusty winds.

CHESAPEAKE BAY SANDY PT TO N BEACH MD COUNTY --- 4.3 WSW THOMAS POINT LIGHT [38.88, -76.51]

	04/28/11 20:06 EST		0	Source: Mesonet

A wind gust of 35 knots was reported at Bishops Head.

TANGIER SOUND AND THE INLAND WATERS SURROUNDING BLOODSWORTH ISLAND COUNTY --- 0.5 E BISHOPS HEAD [38.22, -76.03]				
	04/28/11 20:07 EST		0	Marine Thunderstorm Wind (MG 37 kt)
	04/28/11 20:07 EST		0	Source: Mesonet

A wind gust of 37 knots was reported at Bishops Head.

A strong cold front slowly passed through the waters during the morning and early afternoon hours of the 28th. A southerly flow ahead of the front caused deep moisture over the area. The deep moisture combined with a mid-level trough to produce moderate amounts of instability. The cold front combined with the instability to trigger showers and thunderstorms. Some thunderstorms were able to mix down gusty winds from aloft.

DISTRICT OF COLUMBIA

(DC-Z001) DISTRICT OF COLUMBIA				
	04/16/11 15:52 EST		0	Coastal Flood
	04/17/11 08:06 EST		0	

A strong pressure gradient between high pressure over the Atlantic Ocean and a cold front moving in from the Ohio Valley resulted in a strong onshore flow. Elevated water levels due to the onshore flow caused areas of coastal flooding along near the Tidal Potomac River.

(DC-Z001) DISTRICT OF COLUMBIA				
	04/17/11 19:18 EST		0	Coastal Flood
	04/19/11 09:47 EST		0	

Heavy rainfall on April 16th caused elevated fresh water levels upstream along the Potomac River. A rush of freshwater from the Potomac River caused water levels to rise along the Tidal Potomac River near Washington DC on the 17th. Water levels continued to rise on the 18th before slowly falling during the 19th.

The elevated water levels caused major coastal flooding for areas near the Tidal Potomac River in Washington D.C.

DISTRICT OF COLUMBIA COUNTY --- 1.4 N US CAPITOL [38.90, -77.02]				
	04/24/11 19:34 EST		0	Hail (1.00 in)

	04/16/11 19:03 EST		1K	Thunderstorm Wind (EG 56 kt)
	04/16/11 19:03 EST		0	Source: Trained Spotter

Several small branches were brought down from thunderstorm winds.

Strong low pressure over the Midwest remained cutoff from the jet stream on the 16th. The warm front associated with this system passed through during the morning. Warm and moist southerly winds behind the front provided moderate amounts of instability. The instability combined with forcing from the low for showers and thunderstorms to develop.

There was enough instability along with strong winds aloft for some thunderstorms to become severe.

FREDERICK COUNTY --- 0.9 NE MYERSVILLE [39.51, -77.56], 1.0 NE MYERSVILLE [39.51, -77.56], 1.0 NNE MYERSVILLE [39.51, -77.56], 0.9 NNE MYERSVILLE [39.51, -77.56]

	04/17/11 13:30 EST		0	Flood (due to Heavy Rain)
	04/17/11 20:30 EST		0	Source: Broadcast Media

High water rescue was performed for 3 people on a flooded roadway.

A strong and closed low pressure system over the Ohio Valley remained nearly stationary through the 16th, bringing copious moisture northward up the eastern seaboard. Lift to produce showers and thunderstorms was focused along a warm front that passed north through the mid-Atlantic during the morning. With ground already saturated from several rounds of significant rainfall in the past week, flooding and flash flooding resulted. Rainfall amounts exceeded 4 inches along the Blue Ridge Mountains.

ALLEGANY COUNTY --- RAWLINGS [39.53, -78.88], 1.1 NNE RAWLINGS [39.54, -78.87], 1.2 N RAWLINGS [39.55, -78.88], 0.8 WNW RAWLINGS [39.53, -78.89]

	04/19/11 11:00 EST		0	Flood (due to Heavy Rain)
	04/19/11 18:00 EST		0	Source: State Official

Basements were flooded due to heavy rain.

A wave of low pressure rode along a stationary boundary over northern Maryland, producing scattered showers and isolated thunderstorms. A highly moist atmosphere supported heavy rainfall rates and training activity combined with saturated ground was enough to cause isolated flooding in Allegany County. Rainfall amounts of up to 1.25" were reported.

	04/24/11 18:55 EST		0	Thunderstorm Wind (EG 50 kt)
	04/24/11 18:55 EST		0	Source: Trained Spotter

Small limbs were down through the area.

A southerly flow around high pressure over the Atlantic Ocean provided a warm and moist airmass across the region. A pressure trough combined with the warm and moist conditions to trigger showers and thunderstorms. There was enough instability for some thunderstorms to produce damaging winds and large hail.

PRINCE GEORGE'S COUNTY --- 0.6 WSW FRIENDLY PG ARPK ARP [38.75, -76.96], 0.2 W FRIENDLY PG ARPK ARP [38.75, -76.95]

	04/27/11 18:06 EST		0.10M	Tornado (EF0, L: 0.39 mi , W: 75 yd)
	04/27/11 18:07 EST		0	Source: NWS Employee

A brief tornado occurred at the Potomac Airfield. Six general aviation aircraft suffered minor to major damage. A Cessna 182 had its ti down lanes snapped and then was tossed 120 feet northeast across the taxiway. A Cessna 172 was lifted up and smashed nose first into the ground and a Cessna 335 skymaster was tossed about 25 feet and smashed along the ground.

PRINCE GEORGE'S COUNTY --- 0.4 ENE WESTCHESTER ESTATES [38.78, -76.91], 0.9 N CLINTON [38.78, -76.90]

	04/27/11 18:12 EST		0.10M	Tornado (EF0, L: 0.73 mi , W: 50 yd)
	04/27/11 18:13 EST		0	Source: Public

Significant damage was reported to trees along Spruce Drive and Coventry Way. Some trees fell onto cars and modest damage occurred to shingles and siding.

PRINCE GEORGE'S COUNTY --- 0.7 S ANDREWS MANOR [38.81, -76.90], 0.8 SE ANDREWS MANOR [38.81, -76.89]

	04/27/11 18:16 EST		5K	Tornado (EF0, L: 0.39 mi , W: 100 yd)
	04/27/11 18:17 EST		0	Source: NWS Employee

Numerous trees were uprooted and snapped just southwest of the intersection of Auth Road and Allentown Road. The tornado also produced some roofing and siding damage.

High pressure remained over the western Atlantic while a strong cold front slowly tracked through the Midwest. A southerly flow pumped in copious amounts of moisture from the Atlantic and Gulf of Mexico. The trough of low pressure associated with the cold front provided enough cold air aloft for moderate instability to develop. The instability combined with an upper-level disturbance rotating around the trough to trigger showers and thunderstorms.

Low level winds changed rapidly in speed and direction with height causing isolated tornadoes to develop.

ALLEGANY COUNTY --- 0.7 SE CORRIGANVILLE [39.69, -78.79]

	04/28/11 00:22 EST		1K	Thunderstorm Wind (EG 50 kt)
	04/28/11 00:22 EST		0	Source: Fire Department/Rescue

Several tree limbs were down near the Corriganville Fire Station.

A large hardwood limb was snapped near Rhode River.				
ST. MARY'S COUNTY --- 1.0 WSW ABELLS WHARF [38.26, -76.67], 0.8 ESE LEONARDTOWN [38.29, -76.62]				
	04/28/11 10:25 EST		35K	Tornado (EF1, L: 3.37 mi , W: 150 yd)
	04/28/11 10:29 EST		0	Source: NWS Storm Survey
A tornado tracked across Breton Bay uprooting and snapping numerous large trees. Home roofing and siding damage also occurred. A cinder block wall was blown out from a storage shed. The tornado also passed over Camp Calvert.				
CALVERT COUNTY --- 0.9 WSW APPEAL [38.37, -76.47], 0.5 W BERTHA [38.38, -76.44]				
	04/28/11 10:41 EST		7K	Tornado (EF0, L: 1.71 mi , W: 50 yd)
	04/28/11 10:43 EST		0	Source: NWS Storm Survey
A tornado touched down near the intersection of Hilltop Road and Coster Road. About a dozen trees were uprooted along with several large branches.				
A strong cold front slowly passed through the region during the morning and early afternoon hours of the 28th. A southerly flow ahead of the front caused deep moisture over the area. The deep moisture combined with a mid-level trough to produce moderate amounts of instability. The cold front combined with the instability to trigger showers and thunderstorms. Some thunderstorms were able to mix down strong winds from aloft.				
Low level wind speed and direction changed rapidly with height causing tornadoes to develop in some of the stronger thunderstorms.				
WASHINGTON COUNTY --- 0.5 WSW ROXBURY [39.57, -77.73], 0.7 WSW ROXBURY [39.57, -77.73], 0.7 WSW ROXBURY [39.57, -77.73], 0.5 WNW ROXBURY [39.57, -77.73], 0.3 NW ROXBURY [39.57, -77.72]				
	04/28/11 02:40 EST		0	Flash Flood (due to Heavy Rain)
	04/28/11 06:30 EST		0	Source: State Official
Water was over Route 65 at Roxbury Road. A rain gage near the event measured 2.43 inches.				
WASHINGTON COUNTY --- 1.0 SSW SECURITY [39.64, -77.71], 1.0 SSW SECURITY [39.64, -77.70], 0.6 SSW SECURITY [39.64, -77.70], 0.8 SW SECURITY [39.64, -77.71]

Antietam and Little Antietam Creeks were out of their banks. Rainfall amounts of 1.81 were measured near the event.				

FREDERICK COUNTY --- 1.8 NE JOHNSVILLE [39.55, -77.21], 3.5 ENE JOHNSVILLE [39.55, -77.17], 5.6 NE JOHNSVILLE [39.58, -77.15], 4.5 E LADIESBURG [39.59, -77.19]				
	04/28/11 11:00 EST		0	Flood (due to Heavy Rain)
	04/28/11 18:00 EST		0	Source: Newspaper
Two roads were closed in the Union Bridge area.				

A strong cold front slowly passed through the region during the morning of the 28th. A southerly flow ahead of the front caused deep moisture over the area. The cold front combined with the instability to trigger showers and thunderstorms with very heavy rainfall rates. Slow moving and training convection combined to produce flash flooding in some locations, as over 3.5 inches of rain fell in spots.

VIRGINIA, North

PRINCE WILLIAM COUNTY --- 1.3 W MINNIEVILLE [38.63, -77.37]				
	04/02/11 14:23 EST		0	Hail (1.00 in)
	04/02/11 14:23 EST		0	Source: Public
Quarter sized hail was reported near Dale City.				

A mid-level trough of low pressure provided enough instability for isolated showers and thunderstorms on the 2nd. There was enough cold air aloft for an isolated thunderstorm to produce large hail.

NELSON COUNTY --- LOVINGSTON [37.77, -78.88]				
	04/05/11 02:00 EST		2K	Thunderstorm Wind (EG 50 kt)

Trees were down near South King Street and Davis Avenue in Leesburg.				
Strong low pressure over the Midwest remained cutoff from jet stream on the 16th. The warm front associated with this system passed through during the morning. Warm and moist southerly winds behind the front provided moderate amounts of instability. The instability combined with forcing from the low for showers and thunderstorms to develop.				
There was enough instability along with strong winds aloft for some thunderstorms to become severe.				
AUGUSTA COUNTY --- 2.7 W SPRING HILL [38.25, -79.10], 2.8 W SPRING HILL [38.25, -79.10], 2.7 ESE STOVER [38.25, -79.10], 2.9 W SPRING HILL [38.25, -79.10]

CLARKE COUNTY --- 3.3 ESE BERRYVILLE [39.14, -77.91], 3.4 ESE BERRYVILLE [39.14, -77.91], 3.4 ESE BERRYVILLE [39.14, -77.91], 3.2 ESE BERRYVILLE [39.14, -77.91]

Storm Data and Unusual Weather Phenomena - April 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/16/11 23:00 EST		0	Flood (due to Heavy Rain)
	04/17/11 06:00 EST		0	Source: State Official

North Sheperds Mill Road was closed due to high water. Rainfall near the event was measured at 2.69 inches.

CLARKE COUNTY --- 4.8 NNW BOYCE [39.16, -78.09], 4.4 NNW BOYCE [39.16, -78.08], 3.9 NNW BOYCE [39.15, -78.08], 4.5 NNW BOYCE [39.16, -78.09]

	04/16/11 23:00 EST		0	Flood (due to Heavy Rain)
	04/17/11 06:00 EST		0	Source: State Official

Opequon Creek was out of its banks at Senseny Road. Rainfall near the event was measured at 2.12 inches.

A strong and closed low pressure system over the Ohio Valley remained nearly stationary through the 16th, bringing copious moisture northward up the eastern seaboard. Lift to produce showers and thunderstorms was focused along a warm front that passed north through the mid-Atlantic during the morning. With ground already saturated from several rounds of significant rainfall in the past week, flooding and flash flooding resulted. Rainfall amounts of over 4 inches were observed.

(VA-Z053) FAIRFAX

	04/16/11 15:52 EST		0	Coastal Flood
	04/17/11 07:45 EST		0	

A strong pressure gradient between high pressure over the Atlantic Ocean and a cold front moving in from the Ohio Valley resulted in a strong onshore flow. Elevated water levels due to the onshore flow caused areas of coastal flooding along the Tidal Potomac River in Alexandria.

(VA-Z042) LOUDOUN

	04/20/11 02:40 EST		0	Dense Fog
	04/20/11 07:20 EST		0	

A stationary boundary remained just to the south during the 19th and 20th. An easterly flow on the cool side of the front ushered in plenty of moisture from the Atlantic Ocean during this time. The moisture led to areas of dense fog across northern Virginia early on the 20th.

SHENANDOAH COUNTY --- 0.2 N STRASBURG [38.98, -78.37]

	04/23/11 14:12 EST		0	Thunderstorm Wind (MG 56 kt)
	04/23/11 14:12 EST		0	Source: Mesonet

A wind gust of 65 mph was reported near Strasburg.

An upper-level disturbance triggered showers and thunderstorms across eastern West Virginia on the 23rd. There was enough instability for an isolated thunderstorm to produce damaging winds.

CLARKE COUNTY --- 2.9 N BOYCE [39.14, -78.04]

	04/24/11 14:24 EST		0.50K	Thunderstorm Wind (EG 52 kt)

04/27/11 19:40 EST	0	Source: Trained Spotter

Two trees were down along Route 522.

PRINCE WILLIAM COUNTY --- 2.9 SSW NOKESVILLE [38.66, -77.59], 1.4 NW BRISTOW [38.73, -77.55]

04/27/11 21:46 EST	15K	Tornado (EF1, L: 5.78 mi , W: 125 yd)
04/27/11 22:01 EST	0	Source: NWS Storm Survey

Numerous trees were snapped along Carriage Ford Road, Aden Road and Garman Drive. Siding and shingles were removed from several homes in the area.

Horse run-ins and sheds were also damaged. Garage doors were blown in on a detached garage. A fence was also damaged along with some signs and small trees in the parking lot of a shopping center. A few trees were snapped along Linton Hall Road before the tornado lifted.

FAIRFAX COUNTY --- 0.3 ENE SUNSET HILLS [38.95, -77.34], 1.4 NE SUNSET HILLS [38.96, -77.33]

04/27/11 22:25 EST	40K	Tornado (EF0, L: 1.12 mi , W: 75 yd)
04/27/11 22:28 EST	0	Source: NWS Storm Survey

The tornado began in a parking lot along Sunset Hills Road where small limbs were snapped from a hardwood tree and a large limb was snapped from a softwood tree. The tornado crossed Sunset Hills Road and entered a golf course where it uprooted or snapped several hardwood and softwood trees.

A few trees were snapped or uprooted along Wedge Road and a few homes appeared to have minor damage from the fallen trees. The tornado tracked toward the Oaks Village Center before weakening. Numerous trees were uprooted or snapped near the Oaks Village Center.

High pressure remained over the western Atlantic while a strong cold front slowly tracked through the Midwest. A southerly flow pumped in copious amounts of moisture from the Atlantic and Gulf of Mexico. The trough of low pressure associated with the cold front provided enough cold air aloft for moderate instability to develop. The instability combined with an upper-level disturbance rotating around the trough to trigger showers and thunderstorms.

There was enough instability along with stronger winds aloft for some thunderstorms to become severe. Low level winds changed rapidly in speed and direction with height causing isolated tornadoes to develop.

HIGHLAND COUNTY --- 0.9 NW MC DOWELL [38.34, -79.49], 0.6 NW MC DOWELL [38.34, -79.49], 0.6 WNW MC DOWELL [38.33, -79.49], 0.7 WNW MC DOWELL [38.33, -79.49]

	04/28/11 19:00 EST		0	Source: State Official

Bridge on Morgan Ford Road closed due to flooding.

A strong cold front slowly passed through the region during the morning of the 28th A southerly flow ahead of the front caused deep moisture over the area. The cold front combined with the instability to trigger showers and thunderstorms with very heavy rainfall rates. Slow moving and training convection combined to produce flash flooding in some locations, as rainfall amounts of up to 2.5 inches were observed.

ROCKINGHAM COUNTY --- 1.8 W GENOA [38.65, -78.95]

	04/28/11 09:34 EST		0	Source: Unknown

Trees were down near Lambs creek.

KING GEORGE COUNTY --- 1.0 SSE SEALSTON [38.26, -77.32]

	04/28/11 09:34 EST		0	Thunderstorm Wind (EG 52 kt)
	04/28/11 09:34 EST		0	Source: Unknown

Trees were down near Sealston.

A strong cold front slowly passed through the region during the morning and early afternoon hours of the 28th. A southerly flow ahead of the front caused deep moisture over the area. The deep moisture combined with a mid-level trough to produce moderate amounts of instability. The cold front combined with the instability to trigger showers and thunderstorms. Some thunderstorms were able to mix down strong winds from aloft.

Low level wind speed and direction changed rapidly with height causing tornadoes to develop in some of the stronger thunderstorms.

WEST VIRGINIA, East

(WV-Z505) WESTERN PENDLETON

	04/01/11 20:00 EST		0	Winter Storm
	04/02/11 20:00 EST		0	

A mid level trough of low pressure and associated disturbance combined with steep lapse rates and northwest upsloping flow to produce snow showers across the west facing slopes Allegheny Front. Snow amounts of up to 8 inches accumulated in far western Pendleton County.

PENDLETON COUNTY --- 1.8 ESE KETTERMAN [38.87, -79.22], 2.1 ESE KETTERMAN [38.87, -79.21], 2.1 ESE KETTERMAN [38.87, -79.22], 1.9 ESE KETTERMAN [38.87, -79.22]

Storm Data and Unusual Weather Phenomena - April 2011

A mudslide and flooded basements were reported near the top of the mountain near the Virginia border.				
A strong and closed low pressure system over the Ohio Valley remained nearly stationary through the 16th, bringing copious moisture northward up the eastern seaboard. Lift to produce showers and thunderstorms was focused along a warm front that passed north through the mid-Atlantic during the morning. With ground already saturated from several rounds of significant rainfall in the past week, flooding and flash flooding resulted. Rainfall amounts over the eastern West Virginia panhandle exceeded 3 inches in spots.				
GRANT COUNTY --- 2.1 S MAYSVILLE [39.09, -79.17]				
	04/16/11 19:33 EST		0	Thunderstorm Wind (EG 56 kt)

Knobley Road was closed due to flooding. An observer near the event recorded 1.71" rain.				
A wave of low pressure rode along a stationary boundary over northern West Virginia, producing scattered showers and isolated thunderstorms. A highly moist atmosphere supported heavy rainfall rates and training activity combined with saturated ground was enough to cause isolated flooding. Rainfall amounts of up to 2.01" were reported.				
(WV-Z502) EASTERN GRANT, (WV-Z504) EASTERN MINERAL				
	04/19/11 22:20 EST		0	Dense Fog
	04/20/11 07:59 EST		0	
A stationary boundary remained just to the south during the 19th and 20th. An easterly flow on the cool side of the front ushered in plenty of moisture from the Atlantic Ocean during this time. The moisture led to areas of dense fog during the early morning hours of the 20th.

Trees were down along Waites Run.				
HARDY COUNTY --- 2.5 NNE WARDENSVILLE [39.11, -78.58]				
	04/28/11 01:39 EST		3K	Thunderstorm Wind (EG 61 kt)
	04/28/11 01:39 EST		0	Source: COOP Observer
Numerous trees were down near Wardensville.				
<p>A strong cold front slowly passed through the region during the late evening hours of the 27th into the morning of the 28th. A southerly flow ahead of the front caused deep moisture over the area. The deep moisture combined with a mid-level trough that was associated with the cold front to produce moderate amounts of instability. The cold front combined with the instability to trigger showers and thunderstorms. Gusty winds aloft were able to mix down to the surface in some of the stronger thunderstorms.</p>				
GRANT COUNTY --- 0.9 SE STEBY [39.07, -79.22], 0.8 N STEBY [39.09, -79.23], 0.9 NNW STEBY [39.09, -79.24], 1.0 WSW STEBY [39.08, -79.25]

Route 50 was closed due to flash flooding in Augusta.

MORGAN COUNTY --- BERKELEY SPGS [39.63, -78.23], 2.1 ENE STOHR'S XRDS [39.65, -78.12], 1.2 N STOTLER'S XRDS [39.52, -78.22], 3.0 SE MAGNOLIA [39.55, -78.38]

	04/28/11 03:00 EST		0	Flash Flood (due to Heavy Rain)
	04/28/11 09:00 EST		0	Source: State Official

Multiple reports of small streams flash flooding onto roadways and local farm fields.

A strong cold front slowly passed through the region during the morning of the 28th. A southerly flow ahead of the front caused deep moisture over the area. The cold front combined with the instability to trigger showers and thunderstorms with very heavy rainfall rates. Slow moving and training convection combined to produce flash flooding in some locations, with rainfall measurements approaching 1.5" in places.
