Storm Data and Unusual Weather Phenomena - June 2018

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

The stream gage on the Potomac River at Little Falls/Brookmont exceeded the 10 foot flood stage during the indicated period. The peak level of 12.38 feet was observed at 3:30am EST on June 5th. At the peak levels, water covered multiple sections of the C&O Canal Towpath between mile markers 15 and 20.

Heavy rain of 1-4 inches on June 3rd on saturated soils caused several instances of flooding in the western suburbs of Baltimore. Separately, the combined effects of several days of rain created somewhat widespread river flooding which continued to affect portions of the area through the early morning hours of June 6th.

CARROLL COUNTY --- 0.4 SSE WESTMINSTER [39.58, -77.00]

Water was flowing over Arritt Road at the North Anna River. The bridge to Louisa County was impassable.

PRINCE WILLIAM COUNTY --- 1.0 N BRISTOW [38.73, -77.53], 1.0 N BRISTOW [38.73, -77.53], 0.4 N BRISTOW [38.73, -77.53], 0.4 NNW BRISTOW [38.73, -77.53]

06/24/18 03:40 EST	0	Flood (due to Heavy Rain)
06/24/18 06:02 EST	0	Source: River/Stream Gage

The stream gage on Broad Run in Bristow exceeded the 9.5 foot flood stage during the indicated period. The peak level of 10.17 feet occurred at 5:02am on June 24th. Piper Lane was flooded during the overnight hours.

Heavy rain on saturated soils during the evening of June 21st caused flooding. The heavy rains intensified overnight, causing both flooding and flash flooding early on the 22nd. Widespread flooding persisted throughout Northern Virginia throughout the day n the 22nd. Additional heavy rain during the evening of the 22nd caused more flooding which continued into the 23rd, and the combination of all the rain events created stream flooding that continued through the 24th.

CULPEPER COUNTY --- 2.0 NW JEFFERSONTON [38.65, -77.93]
