A wind gust of 50 knots (58 MPH) was measured by a buoy near Saunders Point Light.

CHOPTANK RIVER TO CAMBRIDGE MD AND THE LITTLE CHOPTANK RIVER COUNTY --- 6.3 WSW CHOPTANK RIVER (CHOP) [38.60, -76.26]

	09/23/21 08:05 EST		0	Marine Thunderstorm Wind (EG 48 kt)
	09/23/21 08:05 EST		0	Source: Mesonet

A thunderstorm produced an estimated wind gust to 48 knots (55 MPH) near a mesonet on Kim Drive adjacent to the tidal Choptank River.

Storm Data and Unusual Weather Phenomena - September 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Several showers and thunderstorms produced gusty winds during the morning hours.

DISTRICT OF COLUMBIA

DISTRICT OF COLUMBIA COUNTY --- 1.0 N MOUNT PLEASANT [38.94, -77.05], 0.7 ENE TENLEYTOWN [38.95, -77.06], 0.8 ENE TENLEYTOWN [38.95, -77.06], 1.2 E TENLEYTOWN [38.95, -77.05]

09/01/21 03:29 EST	0	Flash Flood (due to Heavy Rain)
09/01/21 05:29 EST	0	Source: Broadcast Media

Broad Branch Drive Northwest was washed out between Davenport Street Northwest and Ridge Road Northwest. Trees and boulders were floating across where the roadway used to be.

DISTRICT OF COLUMBIA COUNTY --- 0.8 WSW WALTER REED [38.98, -77.04], 1.4 SW WALTER REED [38.97, -77.05], 1.3 SW WALTER REED [38.97, -77.04], 0.6 SW WALTER REED [38.98, -77.04], 0.6 WSW WALTER REED [38.98, -77.04]

09/01/21 06:32 EST	0	Flood (due to Heavy Rain)
09/01/21 13:46 EST	0	Source: River/Stream Gage

The water level along the Rock Creek in Washington DC rose above flood stage of 7 feet, cresting at 8.04 feet at 11:45 AM EST on the 1st of September. Water reached several portions of the Valley Trail between Picnic Areas 7 and 10 in Rock Creek Park.

The remnants of Ida produced instances of flooding and flash flooding across the area. Tropical moisture infiltrated the area and there were moderate amounts of instability as well. This combined with the lift provided from the remnants of Ida led to heavy rainfall during this time. Rainfall amounts averaged around 1-3".

DISTRICT OF COLUMBIA COUNTY --- 0.5 N LINCOLN MEMORIAL [38.89, -77.05], 0.5 E LINCOLN MEMORIAL [38.88, -77.04], 0.4 N US CAPITOL [38.89, -77.02], 0.8 N US CAPITOL [38.89, -77.02], 0.8 N LINCOLN MEMORIAL [38.89, -77.05], 0.9 NNW LINCOLN MEMORIAL [38.89, -77.06]

09/16/21 14:53 EST	0	Flood (due to Heavy Rain)
09/16/21 16:53 EST	0	Source: Broadcast Media

Maine Avenue SW Westbound at Independence Avenue closed due to high water.

DISTRICT OF COLUMBIA COUNTY --- 1.5 SSW GEORGETOWN [38.90, -77.06], 0.6 W GEORGETOWN [38.92, -77.06], 0.3 NE GEORGETOWN [38.92, -77.05], 1.2 N LINCOLN MEMORIAL [38.90, -77.05]

09/16/21 18:41 EST	0	Flood (due to Heavy Rain)
09/16/21 20:41 EST	0	Source: 911 Call Center

Rock Creek and Potomac Parkway NW closed near K Street NW due to high water.

A light flow aloft along with an unstable atmosphere led to slow moving showers and thunderstorms. Heavy amounts of rain led to instances of flooding.

DISTRICT OF COLUMBIA COUNTY --- 0.2 N GEORGETOWN [38.92, -77.05]

09/22/21 14:27 EST	6K	Thunderstorm Wind (EG 50 kt)
09/22/21 14:27 EST	0	Source: Broadcast Media

Several large trees and branches blew down near Rock Creek Park blocking Beach Drive Northwest for several hours; several large branches also blew down nearby in the 4000 block of Calvert Street Northwest.

Several showers and thunderstorms in a strong low-level wind shear environment produced damaging wind gusts.

DISTRICT OF COLUMBIA COUNTY --- 0.8 NE US CAPITOL [38.89, -77.01], 0.9 E US CAPITOL [38.88, -77.00], 0.6 W US CAPITOL [38.88, -77.03], 0.9 NE LINCOLN MEMORIAL [38.89, -77.04]

09/23/21 06:02 EST	0	Flood (due to Heavy Rain)

The ramp from the 7th Street Southwest to eastbound I-395 Dwight D. Eisenhower Southwest Freeway was closed due to flooding.

DISTRICT OF COLUMBIA COUNTY --- 0.9 SW WALTER REED [38.97, -77.04], 0.5 SW WALTER REED [38.98, -77.04], 0.8 WSW WALTER REED [38.98, -77.04], 1.1 WSW WALTER REED [38.97, -77.05]

Storm Data and Unusual Weather Phenomena - September 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	09/23/21 06:35 EST		0	Flood (due to Heavy Rain)
	09/23/21 13:18 EST		0	Source: River/Stream Gage

The water level along the Rock Creek in Washington DC rose above flood stage of 7 feet, cresting at 7.33 feet at 7:45 AM EST on the 23rd of September. Water reached several portions of the Valley Trail between Picnic Areas 7 and 10 in Rock Creek Park.

A slow moving cold front approached the area on the 22nd before passing through on the 23rd. A deep southerly flow allowed for tropical moisture to move into the area ahead of the boundary. This led to heavy rainfall as the cold front approached, and several instances of flooding along with isolated instances of flash flooding occurred.

MARYLAND, Central

MONTGOMERY COUNTY --- 0.2 S CARDEROCK SPGS [39.00, -77.17]

Multiple large trees blew down with a few snapped near the top in northeastern Anne Arundel County (near Green Haven and Riverdale).

ANNE ARUNDEL COUNTY --- 0.2 E OWENSVILLE [38.85, -76.60], 0.5 W WARDOUR [39.00, -76.51]

09/01/21 13:01 EST	0	Tornado (EF2, L: 11.43 mi , W: 200 yd)
09/01/21 13:23 EST	0	Source: NWS Storm Survey

Storm Data and Unusual Weather Phenomena - September 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

The remnants of Ida produced one of the strongest tornadoes in the past decade of Maryland's history. Only four other EF2 or stronger tornadoes have occurred in the state in the past 10 years.

On Wednesday afternoon, a tornado that peaked in intensity with winds estimated at 125 mph traveled northeast along a path through Anne Arundel County and the City of Annapolis. It not only snapped numerous trees, but also produced significant structural damage to homes, businesses, and a school. Fortunately, there were no injuries reported, even though it tracked through a heavily populated area. Several eyewitnesses to the event reported getting the NWS Tornado Warning through their cell phone in advance, and sheltering in response to the warning.

From the NWS storm survey, the first damage noted, and recorded touchdown point was in Owensville, Maryland, in southern Anne Arundel County, near the intersection of Sudley Road and Owensville Road. This included a large limb from a tree top over Sudley Road and several portions of large cedar trees snapped along Owensville Road. The tornado moved northeast across rural southern Anne Arundel County before crossing Mill Swamp Road. Here, about a quarter of a mile east of the intersection with Dove Farm Road, dozens of trees and large branches were snapped and uprooted in a path from southwest to northeast as far as you could see in either direction from the road. While the dominant direction of the tree damage was being blown down to the north or northeast, there were trees downed in multiple directions, and many were topped.

The tornado intensified further as it moved into the South River Colony community. Dozens of trees were downed along the easternmost portions of Monarch Drive. Homes near the intersection of Monarch Drive and Red Admiral Court were particularly hard hit by some of the strongest winds of the entire tornado path. Several had significant portions of their roof damaged or removed, and one home in the middle of the track was unroofed entirely. One resident in this area reported seeing the tornado as it approached. The tornado then crossed South River Golf Links before moving into a campus of school buildings that includes South River High School and the Center of Applied Technology South. There it damaged the upper parts of the football field grandstands and concessions stand, damaged the roof, and caused cosmetic damage to some of the upper portions of the Center of Applied Technology South. The schools were left structurally sound, and the staff and some students that were there were able to shelter without injury.

The tornado crossed Central Avenue around 2:11 PM and moved into Edgewater. Here it crossed the communities of Woodland Beach, Londontowne, and Edgewater Park. Dozens of trees and large branches were snapped, and portions of 5 to 10 roofs were noted to have been damaged. One home near the intersection of Millstone Drive and Oakwood Road had only damaged roof trusses remaining of its roof.

The tornado crossed the South River and moved through western portions of the City of Annapolis at peak intensity with winds estimated at 125 mph at 2:20 PM. Several trees were snapped along the path as it crossed Aris T. Allen Boulevard just east of the Annapolis Harbour Center shopping area. It crossed Forest Drive at the intersection of Parole Street. Several homes there sustained roof damage, and one home was unroofed entirely. As it crossed the area near the intersection of West Street and Lee Street, the most substantial structural damage was noted. A large warehouse building had the winds enter the south side of the building and blow out a large portion of the west side cinder block wall. The roof with large metal trusses was largely removed. A fast food restaurant had its sign entirely removed from its post. Another commercial building had its roof removed, significant upper portions of the cinder block building removed, and its large commercial sign post blown over. A strip mall across the street had its windows blown out and flat roof damaged. All the telephone poles and attached wires along this stretch of West Street were downed. Another commercial building had its windows blown out. Several eyewitnesses saw the tornado as it passed.

Additional residential roof damage occurred as the tornado moved north over Bowman Court. From here, the tornado crossed into the community of Admiral Heights. Affected were areas along Halsey Road and adjacent Cedar Park Road. Here, the wind did not directly cause any structural damage, but about a dozen trees were snapped. That included one large, healthy tree about two and a half feet in diameter. The tornado crossed Weems Creek and Rowe Boulevard, and then snapped several trees along Riverview Avenue.

Finally, the tornado crossed US Route 50/301 a few hundred yards west of the Severn River Bridge, snapping trees on both sides of the highway. The final damage noted occurred at the end of Acorn Drive at the last residential property that sits on the shore of the Severn River. Several trees were snapped here. The tornado dissipated here, or as it crossed the Severn River. The survey team was not able to find any damage north of the Severn River, and video evidence from social media indicates the funnel dissipated here.

BALTIMORE COUNTY --- 1.3 SSW EVNA [39.56, -76.71]

BALTIMORE COUNTY --- 0.7 WSW FT HOWARD [39.20, -76.44], 3.0 SE (MTN)MARTIN ARPT BAL [39.28, -76.39]				
	09/01/21 13:48 EST		40K	Tornado (EF0, L: 6.73 mi , W: 75 yd)
	09/01/21 14:00 EST		0	Source: NWS Storm Survey
A NWS storm survey team determined that aN EF-0 tornado occurred near Edgemere in Baltimore County, Maryland, on Wednesday afternoon, September 1, 2021. This tornado produced scattered minor tree damage across an approximate 6.7 mile path. This tornado was produced by the same supercell that produced the Anne Arundel County/Annapolis tornado roughly a half hour prior.				
The first damage noted was near Fort Howard Park where there were broken tree branches and a hardwood tree snapped. As the tornado progressed to the northeast, hardwood and softwood trees were snapped and uprooted along Fort Howard Park Road. The tornado continued its northeast trek through North Point State Park where more broken tree branches and softwood trees were found snapped. Sporadic damage continued throughout the park before the tornado crossed the Black River.				
As the tornado moved northeast over Rocky Point, leaf debris and small branches covered Rocky Point Golf Course. The northeast track continued just west of Browns Creek where hardwood trees were sheared on the tree line and tree branches were broken. The last of the damage was found near Holly Beach.				
BALTIMORE COUNTY --- 1.2 WSW CHASE [39.34, -76.40]

The water level along the Potomac River at Edwards Ferry rose above flood stage, cresting at 15.99 feet at 5:30 AM on the 3rd of September. Water reached the boat ramp and lower parking area at Edwards Ferry and it inundated areas near Whites Ferry.				
The remnants of Ida produced widespread flooding along with instances of flash flooding across the area. Tropical moisture infiltrated the area and there were moderate amounts of instability as well. This combined with the lift provided from the remnants of Ida led to heavy rainfall during this time. Rainfall amounts averaged around 1-3" near and east of Interstate 95, with amounts around 4 to 8 inches across portions of northern and central Maryland. Excess runoff from the heavy rainfall led to river flooding as well.				
FREDERICK COUNTY --- 2.5 S MIDDLETOWN [39.41, -77.54]

Storm Data and Unusual Weather Phenomena - September 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
HOWARD COUNTY --- 1.1 ESE ILCHESTER [39.24, -76.75], 1.7 NW ELKRIDGE [39.23, -76.75], 0.8 NW ELKRIDGE [39.23, -76.73], 0.4 NNW ELKRIDGE [39.23, -76.72], 0.6 NNW ELKRIDGE [39.23, -76.72]				
	09/23/21 14:38 EST		0	Flood (due to Heavy Rain)
	09/23/21 16:56 EST		0	Source: River/Stream Gage
The water level rose above flood stage, cresting at 16.39 feet at 3:35 PM EST on the 23rd. Water covered a portion of River Road in the Patapsco Valley State Park. Large portions of the park were flooded near the playground off Gunn Road .				
A slow moving cold front approached the area on the 22nd before passing through on the 23rd. A deep southerly flow allowed for tropical moisture to move into the area ahead of the boundary. This led to heavy rainfall as the cold front approached, and several instances of flooding along with isolated instances of flash flooding occurred.				
ANNE ARUNDEL COUNTY --- 0.0 NNW SEVERN [39.13, -76.70]

Storm Data and Unusual Weather Phenomena - September 2021

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Pack Horse Rd. was closed due to flooding along Little Mountain Run between Brush Creek Rd. and Shockeyville Rd.

The remnants of Ida produced widespread flooding along with instances of flash flooding across the area. Tropical moisture infiltrated the area and there were moderate amounts of instability as well. This combined with the lift provided from the remnants of Ida led to heavy rainfall during this time. Rainfall amounts averaged around 1-3" near and east of Interstate 95, with amounts around 2 to 5 inches across portions of northern Virginia.

ORANGE COUNTY --- 1.4 NNE EVERONA [38.32, -77.96]

09/01/21 01:08 EST	1K	Thunderstorm Wind (EG 50 kt)

Several supercell thunderstorms produced large hail across portions of central Virginia.

WEST VIRGINIA, East

JEFFERSON COUNTY --- 0.9 ESE BOLIVAR [39.32, -77.73], 0.7 E BOLIVAR [39.32, -77.74], 0.7 S HARPERS FERRY [39.32, -77.73], 0.6 S HARPERS FERRY [39.32, -77.73], 0.8 S HARPERS FERRY [39.32, -77.73]

	09/01/21 13:18 EST		0	Flood (due to Heavy Rain)
	09/01/21 15:18 EST		0	Source: 911 Call Center

Rockslide/mudslide closed Chestnut Hill Road near US Route 340.

The remnants of Ida produced widespread flooding along with instances of flash flooding across the area. Tropical moisture infiltrated the area and there were moderate amounts of instability as well. This combined with the lift provided from the remnants of Ida led to heavy rainfall during this time. Rainfall amounts averaged 4 to 8 inches. Excess runoff from the rainfall led to river flooding as well.

PENDLETON COUNTY --- 0.7 S FRANKLIN [38.64, -79.33], 0.8 S FRANKLIN [38.64, -79.33], 1.0 SSW FRANKLIN [38.64, -79.34], 0.9 SSW FRANKLIN [38.64, -79.34], 0.8 SSW FRANKLIN [38.64, -79.33]

	09/22/21 16:29 EST		0	Flood (due to Heavy Rain)
	09/23/21 01:32 EST		0	Source: River/Stream Gage

The water level along the South Branch Potomac River rose above flood stage, cresting at 7.94 feet at 9:55 PM EST. A low spot on Dickenson Mountain Road 300 feet downstream from the bridge began to flood.

Storm Data and Unusual Weather Phenomena - September 2021

	09/24/21 01:12 EST		0	Source: River/Stream Gage

The water level rose above flood stage, cresting at 10.92 feet at 9:45 PM EST on the 23rd of September. Floodwaters covered Douglas Grove Road east of Martinsburg. A portion of Bowers Road was also flooded. Low lying areas near the creek were flooded, and water covered the stream access point to the Van Metre Ford Pedestrian Bridge.

A slow moving cold front approached the area on the 22nd before passing through on the 23rd. A deep southerly flow allowed for tropical moisture to move into the area ahead of the boundary. This led to heavy rainfall as the cold front approached which caused instances of flooding.
