A severe thunderstorm produced an EF1 tornado just east of Rising Sun, MD in Cecil County Saturday evening April 1 2023 between 6:34 PM and 6:41 PM EDT. The severe thunderstorm formed as a result of a multi-cell cluster of thunderstorms that formed ahead of a cold front passage late Saturday afternoon. As the cell moved east of Rising Sun, it began to show signs of rotation.

The tornado touched down in Plumpton Park Zoo, downing a few dozen trees. It then proceeded to near the village of Calvert, just east of Chandlee Road and its intersection with Telegraph Road /MD-273 where three wooden power poles were snapped. The tornado continued to move east along Telegraph Road and caused uprooted and snapped hardwood and softwood trees near Rosebank United Methodist Church. The tornado then moved to the southeast and resulted in extensive tree and minor structural damage in the vicinity of Calvert Regional Park, Cecil Arena, and Rising Sun High School. Over 100 trees were damaged in this area with numerous softwood and hardwood trees being uprooted and snapped. The area was littered with small tree debris. Damage to fencing was observed along with shingles being removed, soffit, fascia, and siding damaged, and other minor structural damage to homes and businesses. At the Calvert Regional Park, portable toilets were broken into several smaller parts and moved more than 300 yards into fields to the north of the storm's track. Also, off North East Road, a wooden power pole was snapped along with several trees downed and a sign blown off the Cecil Arena. The tornado moved further east toward Dr. Miller Road where a small barn collapsed and was moved approximately 50 yards into a field as a result. Additional softwood and hardwood trees were uprooted and snapped along Blue Ball Road with two sheds being moved approximately 100 yards into a field. As the tornado moved to the northeast and began to occlude, additional hardwood and softwood trees were uprooted and snapped between Blue Ball Road and Telegraph Road.

The Federal Aviation Administration's Terminal Doppler Weather Radar in Pennsauken Township, NJ depicted a tight velocity couplet that corresponded to the path of the damage described above.

Additional scattered tree damage in northern Cecil County, MD was determined to be caused by straight-line winds.

### CECIL COUNTY --- 0.1 SW AIKIN [39.57, -76.07]

04/01/23 17:35 EST	12K	Thunderstorm Wind (EG 56 kt)

Tree damage was reported near Riva, including a tree that blew down near the intersection of Governor Bridge Road and Blackberry Lane.

**A few thunderstorms under an upper-level low produced localized marginally severe hail.**

## Storm Data and Unusual Weather Phenomena - April 2023

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>MONTGOMERY COUNTY --- 1.4 SE POOLESVILLE [39.14, -77.40], 1.4 ESE POOLESVILLE [39.14, -77.40]</b>				
	04/22/23 12:58 EST		30K	Tornado (EF0, L: 0.44 mi , W: 50 yd)
	04/22/23 12:59 EST		0	Source: NWS Storm Survey
<p>On Saturday afternoon at 1:58 PM EDT, an EF-0 tornado touched down in Poolesville, MD. This tornado was brief, only being on the ground until 1:59 PM EDT. It had estimated 75 MPH winds with a path length of 0.4 miles and path width approximately 50 yards.</p> <p>Damage was sporadic along its path. The first evidence of damage was near the intersection of Fisher Avenue and Spates Hill Road , where a residence in the 17000 block of Spates Hill Road had three cedar trees blown down in a unidirectional orientation. This was likely the rear flank downdraft of the storm that initiated the formation of the tornado..</p> <p>The first evidence of tornadic damage was in the 17100 block of Campbell Farm Road. Here, several single family home residences suffered tree damage , with downed and snapped trees, along with an air conditioning unit and a temporary metal trailer moved from their foundations.</p> <p>The tornado briefly lifted before producing damage to trees near the intersection of Wootton Avenue and Hempstone Court . Here, large limbs of trees were snapped in different directions, along with trees being uprooted in a direction opposite of the storm motion.</p> <p>The tornado briefly lifted, before touching down again for the final time at the interface between the western portion of L.M. Stevens Park and the backyards of several single family homes along the 19100 block of Dowden Circle. Here, there were two softwood trees uprooted falling to the northwest, with another softwood tree snapped. One utility shed was damaged by a tree that fell onto it. One home incurred damage with a large limb that blew onto the deck. A wooden fence was blown over to the northwest. Leaf debris was observed on all four sides of one of the residences. An apple tree was snapped, with the losse top coming to rest towards the east, which was the opposite direction of other damage in that immediate area.</p>

A line of severe thunderstorms produced an EF0 tornado along its leading edge as it passed over Fork, Fallston and western Bel Air Maryland on the mid-afternoon of Saturday April 22nd. The tornado was on the ground intermittently for eight minutes, but it produced a fair amount of tree damage along its nearly 7 mile path. Wind gusts where it caused noted damage were estimated 70 to 75 miles per hour along its path.				
It strengthened slightly as it crossed the border into Harford County. There was numerous large branches snapped and downed power lines along Reckord Road as the tornado traveled along it. There were also 4 large trees snapped in the 400 block of Reckord Road.				
The tornado continued northeast and produced similar damage to many trees with large branches snapped mainly off the upper parts of trees , with a few falling on homes and vehicles. Affected properties included those along Old Fallston Road, Watervale Road, Waters Avenue, Red Pump Road, Fox Den Road, and Vale Road. About 10 trees and large branches were down in a wooded park near the intersection of Red Pump Road and Vale Road in multiple directions. Two eyewitnesses reported seeing the rotating funnel as it passed . Another reported debris swiftly rotating up off the ground and tops of trees being spun in circles.				
The final significant large branch damage noted was about a quarter mile southwest of the intersection of state route 24 and Red Pump Road, along Marywood Drive.
