 Chief, Systems Integration Branch
 NCEP Central Operations

Subject: NCEP Model Analysis and Guidance Webpage to Become Operational:
Effective March 15, 2011

On Tuesday, March 15, 2011, the National Centers for Environmental Prediction (NCEP) Model Analysis and Guidance (MAG) website will move from experimental to operational. The decision to declare the MAG website operational is based upon comments received. The older Model Analysis and Forecast (MAF) webpages will be removed by the end of March. NCEP will issue a Technical Implementation Notice announcing this removal.

The NWS previously issued a [Public Information Statement \(PNS\) announcing the NCEP experimental Model Analysis and Guidance \(MAG\) website](#) available at:

<http://mag.ncep.noaa.gov>

and proposing to replace the MAF website with this newer service. The MAG website showcases the NWS suite of graphical numerical model analyses and guidance and observational database. A document is provided on the MAG website to describe the service and guide users in transitioning to the new MAG.

For more information and updates, refer to the MAG's Latest Information and News webpage:

http://mag.ncep.noaa.gov/NCOMAGWEB/whats_new.html

For questions regarding these changes, please contact:
