Technical Implementation Notice 11-05 National Weather Service Headquarters Washington DC 1241 PM EST Tue Feb 8 2011

- To: Subscribers: -Family of Services -NOAA Weather Wire Service -Emergency Managers Weather Information Network -NOAAPort Other NWS Partners, Users and Employees
- From: Michelle Mainelli Chief, Systems Integration Branch NCEP Central Operations

Subject: NCEP Model Analysis and Guidance Webpage to Become Operational: Effective March 15, 2011

On Tuesday, March 15, 2011, the National Centers for Environmental Prediction (NCEP) Model Analysis and Guidance (MAG) website will move from experimental to operational. The decision to declare the MAG website operational is based upon comments received. The older Model Analysis and Forecast (MAF) webpages will be removed by the end of March. NCEP will issue a Technical Implementation Notice announcing this removal.

The NWS previously issued a <u>Public Information Statement (PNS) announcing</u> the NCEP experimental Model Analysis and Guidance (MAG) website available at:

http://mag.ncep.noaa.gov

and proposing to replace the MAF website with this newer service. The MAG website showcases the NWS suite of graphical numerical model analyses and guidance and observational database. A document is provided on the MAG website to describe the service and guide users in transitioning to the new MAG.

For more information and updates, refer to the MAG's Latest Information and News webpage:

http://mag.ncep.noaa.gov/NCOMAGWEB/whats new.html

For questions regarding these changes, please contact:
