 -NOAAPort
 Other NWS Partners, Users and Employees

From: John Derber, Acting Chief
 Global Climate and Weather Modeling Branch
 NCEP/Environmental Modeling Center

Subject: Corrected: Termination of NCEP's Legacy Climate Diagnostic Center
Products: Effective July 23, 2013

Corrected to delete paragraph stating NWS will terminate the CDC products
no later than July 23, 2013.

Amended to set the final effective date for Tuesday, July 23, 2013.

Effective Tuesday, July 23, 2013, the National Centers for Environmental
Prediction (NCEP) will stop producing legacy Climate Diagnostic Center
(CDC) ensemble-based precipitation and surface temperature grids and
disseminating them via the NCEP server. These products are not available
via NOAAPort.

A Public Information Statement was issued on March 4, 2013 requesting
comments on the proposed termination of these products:

https://www.weather.gov/media/notification/pdfs/pns13cdc_removal.pdf

Based on responses received, NWS will terminate the CDC products no later
than July 23, 2013. A revised Technical Implementation Notice (TIN) will
be issued if necessary should the termination date be changed.

The CDC products use an early global atmospheric version of the Climate
Data Analysis System (CDAS) with a resolution of T62 and 28 model layers.
This is followed by a 15-member (control with 7 pairs) ensemble forecast,
run at the 00Z cycle only. Forecasts for precipitation and 995mb
temperature out to 360 hours are posted on the NCEP server at:

<http://www.ftp.ncep.noaa.gov/data/nccf/com/cdc/prod/>
or <ftp://ftp.ncep.noaa.gov/pub/data/nccf/com/cdc/prod/>

These products have become obsolete and users should use the current
operational output from the CDAS and Global Ensemble Forecast System
(GEFS). More details about the products available from these systems is
available at:

<http://www.nco.ncep.noaa.gov/pmb/products/>

If you have questions about this termination, please contact:
