

Emilia (2006)

Dates: 21-28 July 2006

Peak Intensity: Tropical Storm

Tropical Storm Emilia (2006) was a Tropical Storm that moved northwest parallel to southwestern Baja California. As Emilia transitioned through, a surge of tropical moisture was sent up the Gulf of California and into southern Arizona. The rain resulting from this moisture surge manifested itself on the 31 July 2006 with several reports from spotters of flash flooding(see additional information links below).

Storm Track:
