

National Weather Service Forecast Office Tucson, Arizona

Cyclone: Tropical Storm Kirsten
Date it affected AZ: September 29, 1966
Affected Arizona as...: Remnants (dissipated over northeastern Sonora, Mexico)

Kirsten produced only spotty heavy rain in southeast Arizona. However, 1.26 inches of rain was reported in Nogales, AZ. There were few reporting stations in southern Arizona in the mid 1960s, though, so it is entirely possible that heavier rains fell elsewhere in the region.
